

## INTERNATIONAL CONFERENCE FINANCIAL SYSTEM STABILITY, REGULATION AND FINANCIAL INCLUSION

Jointly Organized by the Financial Services Agency, Japan, the Asian Development Bank Institute and the International Monetary Fund

January 27, 2014, 10:00 a.m.-6:00 p.m. Auditorium, Third Floor, Central Common Government Offices, No.7, East Wing

## Concept

In light of the current global financial situation, key challenges for financial authorities are to maintain financial stability, manage sovereign risk, ensure long-term finance for economic growth, and also to foster a competitive financial industry. Striking the appropriate balance in achieving these objectives through financial regulation is an important policy issue for financial regulators.

A particular feature of Asian economies is that SMEs comprise an important part of economies, and that they have strong needs for funds. However, SMEs have difficulty in raising money compared to large firms. Lack of financial data of SMEs makes banks reluctant to lend to SMEs. It is extremely important to decrease the information asymmetry and enable SMEs to have access to stable, long-term finance. Credit Risk Database in Japan is a facility which evaluates credit conditions of SMEs, and development of such a data base is one solution for Asian countries. Policy measures to ensure smooth financing of SMEs are critical for Asia's strong economic growth.

Credit guarantee system for SMEs is under consideration in many Asian countries. While it is important to ensure smooth financing of SMEs, providing too much guarantees for SMEs by the credit guarantee system will create moral hazard problem. Appropriate risk sharing between banks and credit guarantee corporations must be established.

Access to finance has two aspects. One is financing not only for ordinary businesses but also small businesses, and financing for housing purchases and others by individuals. The second aspect is to provide financial services for their financial investment and asset management. The Asian region lacks both aspects. Postal savings and/or agricultural banks can play an important role in financial inclusion.

Financial education for SMEs and individuals is lacking in many developing countries. What kind of programs for financial education is available to enhance and the way forward will be discussed in session 3.

## Agenda

9:30-10:00 a.m. **Registration** 

10:00 a.m. Welcoming Remarks
