Contact of application prov	xy				
Tele	ephone ()			
FA	Х ()			
*1. If the applicant is foreign corporation, please enter the contact in Japan. *2. For address, please write location up to the name of the building and the room number. *3. The "Relevant statutory documents" below shows the documents required for registration application related to each item. *4. Names of the major related laws and regulations are abbreviated as follows: 1) The Act: Financial Instruments and Exchange Act; 2) The FIB Cabinet Office Ordinance: Cabinet Office Ordinance on Financial Instruments Business, etc.; 3) The FIEA Enforcement Order: Order for the Enforcement of the Financial Instruments and Exchange Act; and 4) The Guidelines for Supervision: Comprehensive Guidelines for Supervision of Financial Instruments Business Operators, etc. For items with boxes, please check the box that applies to you. For items requiring written explanation, enter the facts and specific internal rules and other details for you. The purpose of this summary form is to make your situations clear, including the environment for business execution and internal control systems, so as to enable you to smoothly complete the registration procedure. (Items with boxes marked as [Required] are statutory requirements for registration.)					
□ Not a stock comp □ Foreign corporation (Write the corporation)	established on : [date pany (scheduled to es ion (established on : [ate history)	te]) (Required) establish a stock company by: [date] [date]))		
*1: Please attach e	existing documents de	describing your company overview if any (inclu	ding		

- the background of your group companies that have capital ties or other close relationships with your company).
- *2: If you have any foreign group company engaging in Financial Instruments Business, please attach the document indicating the country of business operation, registration number, applicable laws and regulations, scale of the organization, and business performance (including the amount of assets under management).

ii) Status of a board of directors and auditor(s)
(In the case of Investment Management Business)
□ Having a board of directors and auditor(s)/audit & supervisory committee/nominating committee, etc., (established on: [date]) (Required)
□ Not having a board of directors and auditor(s)/audit & supervisory committee/nominating committee, etc. (scheduled to be established on: [date]
*In the case of a foreign corporation, please attach a document (e.g., an organizational chart of the company) showing that it is a corporation of a type equivalent to a company with a board of directors.
(In the case of Investment Management Business for Qualified Investors)
□ Having auditor(s)/audit & supervisory committee/nominating committee, etc. (Established on: [date]) (Required)
□ Not having auditor(s)/audit & supervisory committee/nominating committee, etc.
(Scheduled to be established on: [date]) (Required)
*In the case of a foreign corporation, please attach a document (e.g., an organizationa
chart of the company) showing that it is a corporation of a type equivalent to a company
with auditor(s)/audit & supervisory committee/nominating committee, etc.

[Relevant statutory documents: Certificate of registered matters (Article 29-2(2)(iii) of the Act)]

(2) Scheduled date of commencement of business

Date:

- *1. Enter the date after registration on which you are planning to start business operations. In the case of a new registration, the standard processing period is two months after the application form is received by the competent authority. Prior consultation is not included in this period. To smoothly proceed with the procedure from prior consultation up to registration, (i) the specific operations that you are going to conduct and the methods thereof, (ii) personnel structure, and (iii) internal control systems should be determined at an early stage.
- *2. Please note that, for starting business operations, ADR measures (alternative dispute resolution measures) should be implemented by joining a financial instruments firms association or other means after registration.

(3) Amount of capital/contribution

(i) Amount of capital (or total amount of contribution)	
(In the case of Investment Management Business)	
□ 50 million yen or more (as of: [date]) (Required)
□ Less than 50 million yen (as of: [date])
(In the case of Investment Management Business for Qualifie	d Investors)
□ 10 million yen or more (as of: [date]) (Required)
□ Less than 10 million yen (as of: [date])
(ii) If you have checked an amount that does not most the	etatutory requir

(ii) If you have checked an amount that does not meet the statutory requirement above please explain the timing and method of funding, and other details.

EX.: A capital increase of XX million yen by YYYY is planned on (date).

[Relevant statutory documents: Registration application form Sheet 3, Certificate of registered matters (Article 29-2(2)(iii) of the Act)]

(4) Number of officers and employees (total number of officers and employees, as well as the number for each business office if you have multiple offices.

For a foreign corporation, enter in a bracket the number of staff members in charge of

Japanese customers.)

		/		
			Full-time	Part-time
	Officers	persons	persons	persons
	Officers	(persons)		
	Employoos	persons	persons	persons
	Employees	(persons)		
Total		persons	persons	persons
		(persons)		

^{*} You may prepare and attach an organizational chart instead of this table.

[Relevant statutory documents: Organizational chart (Article 8(ii) and (iii) of FIB Cabinet Office Ordinance)]

(5) Major Shareholder (as defined in Article 29-4(2))

_	jor oriarorioladi (ad a	omioa mir maolo E	·_//		
	(Name of the shareholder)	(Number of possessed voting rights/ Percentage)	(Number of voting rights held by the shareholder itself)	(Number of voting rights held by persons having a special relationship with the shareholder)	shareholder such as
				,	
Ļ					
L					

- *1. When there are multiple shareholders, please <u>attach a relationship diagram</u> clarifying the above relationships.
- *2. When the shareholder is an individual: please attach his/her resume and extract of the certificate of residence (with legal domicile indicated, or any equivalent document in case of an overseas national.)
- *3. When the shareholder is a corporation: please attach a document describing the corporate background, the certificate of registered matters, and resumes and extracts of the certificate of residence (with legal domicile indicated, or any equivalent document in case of an overseas national) of its representative officers (all the officers with the right to represent)
- *4. When the shareholder is a partnership: please check and write each contributor's status of holding voting rights (if no one is applicable, write so.)
- *5. In checking whether a person falls under the "major shareholder", please note that "major shareholder" includes not only those who directly hold voting rights of the registration applicant but also their direct and indirect shareholders up to the ultimate shareholder as long as they hold over 50% of voting rights of the relevant intermediate shareholder, pursuant to the provision regarding "controlling shareholder" and "controlled company" of Article 15-10(2) of the FIEA Enforcement Order. In addition, when a shareholder has a "special relationship" defined in Article 15-10(1) of the FIEA Enforcement Order, the shareholder may constitute the major shareholder as a result of totaling the number of the registration applicant's voting rights held by a person in a "special relationship" with the shareholder even if it does not hold the voting rights.

In case where the "controlled company" is a shareholder holding the voting rights, please check that there are no shareholders that hold over 50% of the voting rights of

the ultimate shareholder, and write so on this form.

[Relevant statutory document: Document indicating the trade name of the major shareholder (Article 10(1)(iii)(b) of the FIB Cabinet Office Ordinance)]

[Relevant statutory document: (In the case of a foreign corporation) document certifying confirmation by the competent foreign authorities regarding the person equivalent to the major shareholder (Article 10(1)(iii)(c) of the FIB Cabinet Office Ordinance)]

(8) Consistency between the business to be registered and the purpose of business in the articles of incorporation

□ No problem (Required)

(Purpose of business: Please write the purposes of business specified in the articles of incorporation)

□ Revision to the articles of incorporation is necessary.

(Please write the purpose of business to be added and schedule for revision)

*Eligibility as an officer (Article 31-5 of the Act)

The provisions of Article 332(2) and Article 336(2) of the Companies Act, for example, are not applied. So please note that "Directors' terms of office continue until the conclusion of the annual shareholders meeting for the last business year which ends within two years from the time of their election" and "Company auditors' terms of office continue until the conclusion of the annual shareholders meeting for the last business year which ends within four years from the time of their election."

[Relevant statutory documents: Articles of incorporation (Article 29-2(2)(iii) of the Act)]

2. Business operations
(1) Purpose for entering the financial instruments business (in case of a foreign corporation,
reason for seeking to register in Japan)
*Please explain the specific background and purpose of deciding to enter the financial
instruments business, based on the company's situation and management policies.

(2) Business plan, and earnings and expenditure plan

- *1. Please explain the specific business plan for after registration based on the expectations such as the number of entrusted investments, amount of assets under management and amount of remuneration in case of a discretionary investment contract, for example.
 - Explain also about specific plans for, among others, developing customers, increasing officers and employees, and expanding business.
- *2. Please attach an estimate of earnings and expenditures for three years after registration. Please also explain the estimated changes in the amount of net assets.
 - Note that it is a statutory requirement to maintain the amount of net assets after registration.
 - (At least 50 million yen for Investment Management Business, and at least 10 million yen for Investment Management Business for Qualified Investors)
- *3. Explain the estimated revenues by the type of business for registration and the kind of contract (such as discretionary investment business and fund management business.)

 Please explain also about the calculation processes.
 - (Ex.) Investment Management Business: (management fee) Invested amount × 2.0%, (performance fee) Investment profits × 20.0%

Type II Financial Instruments Business: (solicitation fee) Amount handled × 1.0%

[Relevant statutory document: Document showing the calculated amount of net assets (Article 10(1)(iii) (a) of the FIB Cabinet Office Ordinance)]

[Points to be noted: Points of Attention Regarding Applications for New Registrations (VI-3-1-1(6) of the Guidelines for Supervision)]

Description and methods of business

(1) Description of business

Check the business(es) below you are going to conduct after registration, and enter the kind of financial instruments (Article 2, paragraph (1), item (XX) Securities) to be actually handled for each business.

- □ Article 2(8)(xii)(a) of the Act (Investment corporation asset management business) Kind of financial instruments:
- □ Article 2(8)(xii)(b) of the Act (Discretionary investment business) Kind of financial instruments:
- □ Article 2(8)(xiv) of the Act (Investment trust management business) Kind of financial instruments:
- □ Article 2(8)(xv) of the Act (Fund management business) Kind of financial instruments:
- □ Investment Management Business for Qualified Investors
- *1. Please prepare and attach a detailed <u>business scheme chart (clearly showing, among others, the flow of customer funds, processes of investment instructions and execution, and important service providers and roles thereof)</u> for each business to be conducted. If the important service provider is not determined, indicate so and explain the scheduled time when it will be determined.
- *2. Do not enter the business that you plan to conduct in the future, as they are not subject to registration examination.
- *3. If you are to conduct Investment Management Business for Qualified Investors, check also the business(es) of (xii) through (xv) above that you are going to conduct.

Overview

*1. For each business operation provided in above (1), please explain the investment management operations including the financial instruments to be handled (such as securities and derivatives), investment strategies, and the common processes (including relevant departments and procedures) of operations such as investment decisions and method of supervision of investment status.

*2. Please prepare and attach a flowchart of business operations

For investment management, the Company mainly targets domestic listed stocks and makes investments under the principle of long-term holding (for xx years). First, the XX investment committee (members: general manager of investment management department, general manager of risk management department, general manager of XX department) decides the investment policies. Based on the decided investment policies, XX department formulates an investment plan. The staff in charge of investment (XX department) makes investment decisions based on the investment plan and places orders with the staff in charge of investment execution (XX

department). Based on the orders received, the staff in charge of investment execution (XX department) issues orders to the XX securities company.

As for supervision of the investment status, XX department examines the operations such as the details of the issued orders on a daily basis to confirm that they are in accordance with the Guidelines, based on XX.

Appendix to questionnaire form (for Investment Management Business [xxxxx business Note to officials: Select applicable form(s) from the following 1 through 6 and send it to applicants.])

As stated in the Guidelines for Supervision, any person conducting an Investment Management Business must ensure sound and proper business operations. Therefore, at the time of the application, we would like to have an overview of the status of the person conducting an Investment Management Business including the environment for business execution and internal control systems. So please provide a specific description for each of the items below, along with attachment documents as necessary.

- *1. You may skip entries on this appendix for items for which you have written in the main body of this Summary.
 - In such case, please write in the "Outline of the Company response" column of the relevant items below, for example, as follows:
 - \rightarrow "Written in 3. Description and methods of business, (2) Methods of business, (iii) Investment management"

In addition, put "Not applicable." for any item that is not applicable to you.

- *2. While the items below are exclusively relevant to Investment Management Business, you may be requested to respond to additional matters picked up from the Guidelines for Supervision (general matters).
- 1. Discretionary investment business (Article 2(8)(xii)(b) of the Act)

Control Environment for Business Execution (VI-2-2-1(1) and (2) of Guidelines for Supervision)

Control Environment for Customer Solicitation and Explanations (VI-2-2-2(1) through (3) of Guidelines for Supervision)

Duty of Loyalty and Measures to Prevent Internal Collusion (VI-2-2-3(1) through (3) of Guidelines for Supervision)

Selection of Agency/Brokerage Service Providers (VI-2-2-4-1(1) of Guidelines for Supervision)

Measures Taken by Primary Business Operators to Ensure the Appropriateness of Agency/Brokerage Service Providers (VI-2-2-4-2(1) through (4) of Guidelines for Supervision)

Other Points of Attention (VI-2-2-5(1) through (3) and (6) of Guidelines for Supervision)

2. Investment trust management business, etc. (Article 2(8)(xii) (a) or (xiv) of the same paragraph)

Control Environment for Business Execution (VI-2-3-1(1) and (2) of Guidelines for Supervision)

Control Environment for Customer Solicitation and Explanations for Beneficiaries, etc. (VI-2-3-2(1) and (2) of Guidelines for Supervision)

Duty of Loyalty and Measures to Prevent Internal Collusion (VI-2-3-3(1) through (3) of Guidelines for Supervision)

Business Continuity Management (BCM) (VI-2-3-4(2) of Guidelines for Supervision)

Other Points of Attention (VI-2-3-5 of Guidelines for Supervision) (VI-2-2-5(2) and (3) of Guidelines for Supervision)

3. Foreign investment trust management business

Control Environment for Business Execution (VI-2-3-1(1) and (2) of Guidelines for Supervision)

Control Environment for Customer Solicitation and Explanations for beneficiaries, etc. (VI-2-3-2(1) of Guidelines for Supervision)

Duty of Loyalty and Measures to Prevent Internal Collusion (VI-2-3-3(1) through (3) of Guidelines for Supervision)

Other Points of Attention (VI-2-3-5 of Guidelines for Supervision) (VI-2-2-5(2) and (3) of Guidelines for Supervision)

4. Fund management business (Article 2(8)(xv) of the Act)

Control Environment for Business Execution (VI-2-5-1(1) and (2) of Guidelines for Supervision)

Control Environment for Customer Solicitation and Explanations (VI-2-5-2(1) and (2) of Guidelines for Supervision)

Duty of Loyalty and Measures to Prevent Internal Collusion (VI-2-5-3(1) through (3) of Guidelines for Supervision)

Other Points of Attention (VI-2-5-4 of Guidelines for Supervision) (VI-2-2-5(2) and (3) of Guidelines for Supervision)

5. In addition to the above, if you fall under the real estate-related fund management company, also answer the following items.

Control Environment for Legal Compliance (VI-2-6-1 of Guidelines for Supervision)

Internal Control Environment (VI-2-6-2 of Guidelines for Supervision)

Evaluation Items Concerning Operations of Real Estate-related Fund Management Companies (VI-2-6-3(1) through (5) of Guidelines for Supervision)

6. In addition to the above, if you fall under the Investment Management Business for Qualified Investors, also answer the following items.

Control Environment for Business Execution (VI-2-7-1(1) and (2), VI-3-1-2(2) of Guidelines for Supervision)

Measures concerning Management of the Total Amount of All Investment Assets (VI-3-1-2(3)(i))

Measures concerning Management of Rights Holders (VI-3-1-2(3)(ii))

Measures to be Taken in case of Conducting Specially Permitted Business for Qualified Institutional Investors, etc. or Other Certain Business (VI-3-1-2(3)(iii))

1. Discretionary investment business

Control Environment for Business Execution (the Guidelines for SupervisionVI-2-2-1(1) and (2))

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(1) Investment and Administration of Investment Assets Supervisors shall examine whether a discretionary investment business operator is properly investing and administering investment assets, by paying attention to the following points. It should be noted that the following points should be taken into consideration in a comprehensive manner in light of the nature and size of the business operator's business, and that failure to meet some of the criteria should not automatically be deemed to mean that the investment of investment assets is inappropriate		_
 (i) Whether the discretionary investment business operator has properly specified the matters regarding internal organization that decide its investment policy (including a specific decision- making process). 		
(ii)Whether the discretionary investment business operator has prescribed a specific investment method for investment of investment assets (as specified under Article 35(1)(xv) of the FIEA; the same shall apply hereinafter) by the investment division		
(iii)Whether the discretionary investment business operator has developed an appropriate control environment for the management of securities transactions between various investment assets and between investment assets and its own assets or third-party assets.		
(iv) In cases where the discretionary investment business operator entrusts all or part of the authority over the investment made on behalf of rights holders (as specified under Article 42(1) of the FIEA; the same shall apply hereinafter) to another entity under Article 42-3 of the FIEA (including cases where the entrusted entity entrusts part of the authority to yet another entity), whether the discretionary investment business operator has properly established the criteria for selecting the entity to which the authority is entrusted and the method of communications therewith. Whether the discretionary investment business operator has developed a control environment for		

	T T	
continuously examining the entrusted		
entity's business execution capability and		
its compliance with contract provisions.		
Whether it has specified measures to be		
taken when a problem is found in the		
entrusted entity's business execution		
· · · · · · · · · · · · · · · · · · ·		
capability (e.g., providing guidance for		
business improvement and refusing to		
renew the entrustment contract).		
(v) Regarding the selection of the entities to		
which orders are placed and business		
operations are entrusted, whether the		
discretionary investment business		
operator has properly specified the		
matters concerning the entities'		
transaction execution capability, the		
control environment for legal compliance,		
credit risk and trading costs as items that		
should be taken into consideration.		
(vi) Whether the discretionary investment		
business operator has arrangements and		
procedures for a division independent		
from the investment division to		
periodically examine whether investment		
assets are properly managed, including		
whether the investment decision process		
is appropriate, in accordance with the		
discretionary investment contract and the		
investment guideline (including whether		
records on the investment status are		
stored).		
(vii)In cases where rights holders (excluding		
specified investors; the same shall apply		
specified investors; the same shall apply		
specified investors; the same shall apply to (vii) through (ix)) entrust investment		
specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and		
specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and investment is made in subject securities		
specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and investment is made in subject securities (as specified under Article 130(3) of the		
specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and investment is made in subject securities (as specified under Article 130(3) of the FIB Cabinet Office Ordinance; the same		
specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and investment is made in subject securities (as specified under Article 130(3) of the FIB Cabinet Office Ordinance; the same		
specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and investment is made in subject securities (as specified under Article 130(3) of the FIB Cabinet Office Ordinance; the same shall apply to (vii) through (ix)), whether		
specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and investment is made in subject securities (as specified under Article 130(3) of the FIB Cabinet Office Ordinance; the same shall apply to (vii) through (ix)), whether the discretionary investment business		
specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and investment is made in subject securities (as specified under Article 130(3) of the FIB Cabinet Office Ordinance; the same shall apply to (vii) through (ix)), whether the discretionary investment business operator has developed an appropriate

specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and investment is made in subject securities (as specified under Article 130(3) of the FIB Cabinet Office Ordinance; the same shall apply to (vii) through (ix)), whether the discretionary investment business operator has developed an appropriate control environment to ensure that (i) an arrangement to enable the trust company, etc., to directly receive a notice on the value of the subject securities from a person who computes the value, or (ii) an arrangement to enable the trust company, etc., to directly ask a person who computes the value to assess the value of subject securities, is taken as the arrangement necessary for the trust		
specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and investment is made in subject securities (as specified under Article 130(3) of the FIB Cabinet Office Ordinance; the same shall apply to (vii) through (ix)), whether the discretionary investment business operator has developed an appropriate control environment to ensure that (i) an arrangement to enable the trust company, etc., to directly receive a notice on the value of the subject securities from a person who computes the value, or (ii) an arrangement to enable the trust company, etc., to directly ask a person who computes the value to assess the value of subject securities, is taken as the arrangement necessary for the trust company, etc., to know the true value of		
specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and investment is made in subject securities (as specified under Article 130(3) of the FIB Cabinet Office Ordinance; the same shall apply to (vii) through (ix)), whether the discretionary investment business operator has developed an appropriate control environment to ensure that (i) an arrangement to enable the trust company, etc., to directly receive a notice on the value of the subject securities from a person who computes the value, or (ii) an arrangement to enable the trust company, etc., to directly ask a person who computes the value to assess the value of subject securities, is taken as the arrangement necessary for the trust company, etc., to know the true value of		
specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and investment is made in subject securities (as specified under Article 130(3) of the FIB Cabinet Office Ordinance; the same shall apply to (vii) through (ix)), whether the discretionary investment business operator has developed an appropriate control environment to ensure that (i) an arrangement to enable the trust company, etc., to directly receive a notice on the value of the subject securities from a person who computes the value, or (ii) an arrangement to enable the trust company, etc., to directly ask a person who computes the value to assess the value of subject securities, is taken as the arrangement necessary for the trust company, etc., to know the true value of the subject securities. Whether the		
specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and investment is made in subject securities (as specified under Article 130(3) of the FIB Cabinet Office Ordinance; the same shall apply to (vii) through (ix)), whether the discretionary investment business operator has developed an appropriate control environment to ensure that (i) an arrangement to enable the trust company, etc., to directly receive a notice on the value of the subject securities from a person who computes the value, or (ii) an arrangement to enable the trust company, etc., to directly ask a person who computes the value to assess the value of subject securities, is taken as the arrangement necessary for the trust company, etc., to know the true value of the subject securities. Whether the discretionary investment business		
specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and investment is made in subject securities (as specified under Article 130(3) of the FIB Cabinet Office Ordinance; the same shall apply to (vii) through (ix)), whether the discretionary investment business operator has developed an appropriate control environment to ensure that (i) an arrangement to enable the trust company, etc., to directly receive a notice on the value of the subject securities from a person who computes the value, or (ii) an arrangement to enable the trust company, etc., to directly ask a person who computes the value to assess the value of subject securities, is taken as the arrangement necessary for the trust company, etc., to know the true value of the subject securities. Whether the discretionary investment business operator has periodically checked, even		
specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and investment is made in subject securities (as specified under Article 130(3) of the FIB Cabinet Office Ordinance; the same shall apply to (vii) through (ix)), whether the discretionary investment business operator has developed an appropriate control environment to ensure that (i) an arrangement to enable the trust company, etc., to directly receive a notice on the value of the subject securities from a person who computes the value, or (ii) an arrangement to enable the trust company, etc., to directly ask a person who computes the value to assess the value of subject securities, is taken as the arrangement necessary for the trust company, etc., to know the true value of the subject securities. Whether the discretionary investment business operator has periodically checked, even after having invested in the subject		
specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and investment is made in subject securities (as specified under Article 130(3) of the FIB Cabinet Office Ordinance; the same shall apply to (vii) through (ix)), whether the discretionary investment business operator has developed an appropriate control environment to ensure that (i) an arrangement to enable the trust company, etc., to directly receive a notice on the value of the subject securities from a person who computes the value, or (ii) an arrangement to enable the trust company, etc., to directly ask a person who computes the value to assess the value of subject securities, is taken as the arrangement necessary for the trust company, etc., to know the true value of the subject securities. Whether the discretionary investment business operator has periodically checked, even		
specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and investment is made in subject securities (as specified under Article 130(3) of the FIB Cabinet Office Ordinance; the same shall apply to (vii) through (ix)), whether the discretionary investment business operator has developed an appropriate control environment to ensure that (i) an arrangement to enable the trust company, etc., to directly receive a notice on the value of the subject securities from a person who computes the value, or (ii) an arrangement to enable the trust company, etc., to directly ask a person who computes the value to assess the value of subject securities, is taken as the arrangement necessary for the trust company, etc., to know the true value of the subject securities. Whether the discretionary investment business operator has periodically checked, even after having invested in the subject securities, that the above-mentioned		
specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and investment is made in subject securities (as specified under Article 130(3) of the FIB Cabinet Office Ordinance; the same shall apply to (vii) through (ix)), whether the discretionary investment business operator has developed an appropriate control environment to ensure that (i) an arrangement to enable the trust company, etc., to directly receive a notice on the value of the subject securities from a person who computes the value, or (ii) an arrangement to enable the trust company, etc., to directly ask a person who computes the value to assess the value of subject securities, is taken as the arrangement necessary for the trust company, etc., to know the true value of the subject securities. Whether the discretionary investment business operator has periodically checked, even after having invested in the subject securities, that the above-mentioned arrangements are in place.		
specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and investment is made in subject securities (as specified under Article 130(3) of the FIB Cabinet Office Ordinance; the same shall apply to (vii) through (ix)), whether the discretionary investment business operator has developed an appropriate control environment to ensure that (i) an arrangement to enable the trust company, etc., to directly receive a notice on the value of the subject securities from a person who computes the value, or (ii) an arrangement to enable the trust company, etc., to directly ask a person who computes the value to assess the value of subject securities, is taken as the arrangement necessary for the trust company, etc., to know the true value of the subject securities. Whether the discretionary investment business operator has periodically checked, even after having invested in the subject securities, that the above-mentioned arrangements are in place. (viii) In cases where rights holders entrust		
specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and investment is made in subject securities (as specified under Article 130(3) of the FIB Cabinet Office Ordinance; the same shall apply to (vii) through (ix)), whether the discretionary investment business operator has developed an appropriate control environment to ensure that (i) an arrangement to enable the trust company, etc., to directly receive a notice on the value of the subject securities from a person who computes the value, or (ii) an arrangement to enable the trust company, etc., to directly ask a person who computes the value to assess the value of subject securities, is taken as the arrangement necessary for the trust company, etc., to know the true value of the subject securities. Whether the discretionary investment business operator has periodically checked, even after having invested in the subject securities, that the above-mentioned arrangements are in place. (viii) In cases where rights holders entrust investment assets to a trust company,		
specified investors; the same shall apply to (vii) through (ix)) entrust investment assets to a trust company, etc., and investment is made in subject securities (as specified under Article 130(3) of the FIB Cabinet Office Ordinance; the same shall apply to (vii) through (ix)), whether the discretionary investment business operator has developed an appropriate control environment to ensure that (i) an arrangement to enable the trust company, etc., to directly receive a notice on the value of the subject securities from a person who computes the value, or (ii) an arrangement to enable the trust company, etc., to directly ask a person who computes the value to assess the value of subject securities, is taken as the arrangement necessary for the trust company, etc., to know the true value of the subject securities. Whether the discretionary investment business operator has periodically checked, even after having invested in the subject securities, that the above-mentioned arrangements are in place. (viii) In cases where rights holders entrust		

securities, whether the discretionary		
investment business operator has		
·		
developed an appropriate control		
environment to ensure that a fund audit		
(as specified under Article 130(4) of the		
` '		
FIB Cabinet Office Ordinance; the same		
shall apply hereinafter) is conducted for		
the assets invested or contributed from a		
person having rights to the subject		
securities. Whether the discretionary		
•		
investment business operator has		
periodically checked, even after having		
invested in the subject securities, that the		
above-mentioned fund audit is		
conducted. In a case where the		
discretionary investment business		
operator is involved in the appointment of		
an external auditor in charge of the fund		
audit, whether the discretionary		
investment business operator has made		
efforts to ensure that the fund audit is		
independent and effective.		
(ix)In cases where rights holders entrust		
investment assets to a trust company,		
• • •		
etc., and investment is made in subject		
securities, whether the discretionary		
investment business operator has		
developed an appropriate control		
environment to ensure that necessary		
arrangements are made to enable the		
trust company, etc., to receive a true		
audit report, etc., on the fund audit.		
Whether the discretionary investment		
business operator has periodically		
checked, even after having invested in		
the subject securities, that the above-		
mentioned arrangements are in place.		
(2) Execution of Transactions		
When discretionary investment		
business operators execute		
transactions, they are required to		
select the transaction form that		
benefits customers most, by taking		
into consideration the transaction		
price and other execution costs in a		
comprehensive manner. In light of the	_	_
increasing diversification of the		
transaction forms due to the advance		
of financial techniques, supervisors		
discretional investment business		
operator's transaction execution by		
paying attention to the following		
points, for example:		
(i) At-Average-Price Transaction (transaction		
``		
made at the average of prices of various		
orders of the same transaction and		
delivery dates, aggregated by issue and		
order category (sell or purchase)))		
A. Separation of Divisions		
Whether the discretionary		

investment business operator has		
investment divisions and for taking		
orders. In cases where		
organizational separation is difficult,		
whether, at the minimum, different		
persons are responsible for these		
two tasks.		
B. Examination of Transactions		
investment business operator has a		
control environment for ensuring that		
a relevant management division, for		
example, examines the whole range		
of business processes related to at-		
average-price transactions.		
C. Disclosure to Customers and		
Consent Thereof		
Whether the discretionary		
investment business operator makes		
·		
at-average-price transactions after		
making prior disclosure to customers		
and obtaining their consent. In cases		
where the discretionary investment		
business operator places orders		
involving the proportional allocation		
of executed transactions with regard		
to two or more investment asset		
accounts, whether it provides		
customers with appropriate		
explanations regarding the criteria		
for allocation in the case of the total		
executed transaction volume falling		
short of the total order volume.		
(ii) Transactions Made via Bulk Orders		
In cases where the discretionary		
investment business operator places a		
bulk sell or buy order for the same issue		
on behalf of two or more investment		
asset accounts, and allocates executed		
•		
transactions to each asset account based		
on the allocation criteria prescribed by		
the business operator after aggregating		
the transactions by issue and by buy/sell		
order, whether it has developed a control		
environment similar to the one described		
1		
ensuring fairness among customers.		
(iii)Transactions Made between Investment		
Asset Accounts		
Transactions made between		
investment asset accounts are in		
principle prohibited because there is a		
· · · · · · · · · · · · · · · · · · ·		
risk that investors in one of the funds		
involved in the transactions may receive		
unfavorable treatment and that such		
transactions may be utilized in acts that		
go against investor protection such as		
transfers of profits between funds.		
On the other hand, of transactions		
specified under Article 129(1)(i) of the FIB		
	1	

Cabinet Office Ordinance, if a transaction between investment assets accounts falls under a case where the prohibition of transactions between investment assets accounts does not apply, the relevant management division is required to be adequately prepared to verify that the transactions meet the requirements in (a) and (b) of Article 129(1)(i).

The "case where it is deemed to be necessary and rational," as specified by Article 129(1)(i)(a)(4) of the FIB Cabinet Office Ordinance, is a case in which transactions between investment assets accounts executed by fund management companies meet the need to ensure fairness among customers and to fulfill its duties of best execution and loyalty to customers. and this applies transactions in which relevant "sell" or "buy" decisions by each of the funds are deemed necessary and rational, and that are executed in the best possible manner for the investment decisions made thus (or the each of transactions executed to follow the best execution practice results in transactions between investment assets accounts).

In determining whether there is necessity and rationality, factors such as the investment policy of the funds involved (including in-house investment limits introduced (for the purpose of risk management, etc.) by the investment business operators, inflow or outflow of money associated with cancellation/formation of funds (including whether there is a need to sell or buy assets in order to maintain the portfolios of each funds, etc.), etc. are considered.

On the other hand, from the viewpoint of best execution practice, factors such as transaction costs, mitigation of market impact, etc. are considered in addition to transaction prices.

From the above viewpoints, such transactions as listed below are considered as ones in which fairness among funds and fair price formation are ensured and as constituting a "case where it is deemed to be necessary and rational." (It must be noted, however, that these are shown only as examples and not the only ones that qualify.)

A. To have traders execute transactions based on investment decisions made by several fund managers (limited to transactions regarding which there is not the risk of the price formation process being distorted in light of liquidity and other factors related to the relevant issue and, in cases

where the transactions are executed	
by the same trader, transactions of	
which the trader has no discretion	
over execution).	
B. To place both market buy and sell	
orders before the market's opening	
(limited to orders which have no risk	
of distorting the price formation	
process in light of liquidity and other	
factors related to the relevant issue).	
C. To place both buy and sell orders in	
intraday trading at a reasonable	
intervals (limited to orders which	
have no risk of distorting the price	
formation process in light of liquidity	
and other factors related to the	
relevant issue).	
D. To make transactions related to index	
funds executed through program	
trading based on contracts and trust	
contract provisions (limited to	
transactions which have no risk of	
distorting the price formation process	
in light of liquidity and other factors	
related to the relevant issue).	
E. To make VWAP transactions and	
discretionary transactions, regarding	
which the decision on the timing of	
order placement, price and other	
execution terms related to individual issues are entrusted by the fund	
·	
management company to a third- party entity (limited to transactions	
which have no risk of distorting the	
price formation process in light of	
liquidity and other factors related to	
the relevant issue).	
F. To make futures transactions.	
regarding which it is difficult to avoid	
the placement of orders for the same	
issue because of the small number of	
issues available for futures trading	
(limited to transactions which have no	
risk of distorting the price formation	
process in light of liquidity and other	
factors related to the relevant issue).	

Control Environment for Customer Solicitation and Explanations (the Guidelines for Supervision VI-2-2-2(1) to (3))

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(1) Prohibition of Advertisements Using Exaggerated Descriptions	_	_
(i) Whether the Financial Instruments Business Operator includes in its advertisements descriptions indicating that the performance, contents and method of its investment are markedly		

superior to those of other Financial Instruments Business Operators without		
providing the basis therefor.		
(ii) When including investment performance		
data in its advertisement, whether the		
Financial Instruments Business Operator		
uses descriptions that could cause		
misunderstanding by investors, by putting		
excessive emphasis on specific parts of		
the performance. (When investment		
performance data is included in an		
advertisement, appropriate and easy-to-		
understand descriptions must be made,		
from the viewpoint of protecting investors.		
For example, it is necessary to examine		
whether the advertisement specifies the		
method of investment evaluation and the		
basis for the use of benchmarks and		
properly expresses that the investment		
performance data is an indicator that		
concerns past results but does not		
promise future performance.)		
(iii) When including investment simulation in		
its advertisement, whether the Financial		
Instruments Business Operator uses		
descriptions that could cause		
misunderstanding by investors, by setting		
arbitrary assumptions, for example.		
(When investment simulation is included		
in an advertisement, appropriate and		
easy-to-understand descriptions must be		
used, from the viewpoint of protecting		
investors. For example, it is necessary to		
examine whether the advertisement		
specifies the basis for the use of		
assumptions in the simulation and		
properly indicates that the simulation is		
based on prescribed assumptions and		
does not promise future investment		
performance.)		
(2) Points of Attention Regarding		
Provision of Pre-Contract Documents	-	_
(i) In cases where a discretionary investment		
business operator concurrently		
undertakes services unrelated to		
discretionary investment business and		
where it receives remuneration related to		
discretionary investment business and		
fees related to other services collectively		
under the same contract, the business		
operator must separately specify the		
remuneration related to discretionary		
investment business and the fees related		
to other services with regard to the		
"matters concerning fees, remuneration or		
any other consideration payable by the		
customer with regard to said Contract for		
Financial Instruments Transaction," as		
specified under Article 37-3(1)(iv) of the		
FIEA.		
(ii) The "methods of investment and types of		

	T
transactions," as specified under Article	
96(1)(i) of the FIB Cabinet Office	
Ordinance, include specific investment	
methods (including the individual	
investment method, the common	
·	
investment method (under which several	
customers' assets are invested in the	
same way with regard to specific	
securities and the timing of sales and	
purchases and are administered on a	
·	
customer-by-customer basis by the same	
asset administration organization; the	
same shall apply hereinafter) and the joint	
investment method (under which several	
customers' assets are jointly invested and	
jointly administered; the same shall apply	
hereinafter)) and also include the	
following items in the case of common	
investment and joint investment:	
· ·	
A. In the case of common investment	
a. Items regarding the asset	
administration organization in	
charge of common investment	
assets.	
5.5555	
b. Items regarding the criteria for the	
allocation of assets acquired	
through the common investment	
I = = = = = = = = = = = = = = = = = = =	
B. In the case of joint investment	
a. Customers' attributes and types of	
customer assets and items	
regarding the criteria for joint	
investment	
5 5	
administration organization in	
charge of joint investment assets	
c. Items regarding the criteria for the	
allocation of assets acquired	
through the joint investment	
d. Items regarding the evaluation	
method of joint investment assets	
and the calculation method of each	
customer's interests in the assets	
(including cases where assets are	
withdrawn from the joint investment	
prematurely).	
(iii)The "items regarding the scope of	
discretionary investment decisions and	
the implementation of investment," as	
specified under Article 96(1)(iii) of the FIB	
Cabinet Office Ordinance, include the	
trade names, addresses, the names of	
the representative of the business	
operators specified under each item of	
1	
Article 16-12 of the FIEA Enforcement	
Order (hereinafter referred to as "re-	
entrusted entity") as well as the scope of	
re-entrustment.	
(iv)The "external audit of business operations	
related to financing or discretionary	
investment contracts" as specified under	
Article 96(1)(vi) of the FIB Cabinet Office	
The state of the s	

Ordinance includes the following		
(including the equivalent thereof):		
- Audit certification pursuant to Article 193-		
2 (1) of the FIEA ("audit of financial		
statements" in VI-3-2-3 (1) (iv)) and		
audit certification pursuant to Article		
193-2 (2) of the FIEA ("audit of internal		
control" in VI-3-2-3 (1) (iv));		
` ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' ' '		
 Audit by an accounting auditor under the 		
Companies Act;		
- Assurance engagements on internal		
controls of outsources (assurance		
· ·		
engagements on internal controls in VI-		
3-2-3 (1) (iv)) in accordance with the		
standards, including the Audit and		
Assurance Practice Committee Practical		
Guidelines No.86, the "assurance report		
•		
on internal control of entrusted		
business" (JICPA), the Statement on		
Standards for Attestation Engagements

etc., and the fund-related persons" as		
specified under Article 96(2)(iii) of the FIB		
Cabinet Office Ordinance, if the fund-		
related person is the parent corporation,		
etc., (as specified under Article 1(3)(xiv) of		
the FIB Cabinet Office Ordinance) of the		
financial instruments business operator,		
etc., a subsidiary corporation, etc., (as		
specified under Article 1(3)(xvi) of the FIB		
Cabinet Office Ordinance) of the financial		
instruments business operator, etc., or a		
related foreign corporation, etc., (as		
specified under Article 126 (iii) of the FIB		
Cabinet Office Ordinance) of the financial		
instruments business operator, etc., such		
fact must be entered.		
(vi)As for the "personal relationship between		
the financial instruments business		
operator, etc., and the fund-related		
persons" as specified under Article		
96(2)(iii) of the FIB Cabinet Office		
Ordinance, the conditions of concurrent		
holding of positions by officers or		
employees at a specific time which is		
deemed to be reasonable must be		
entered.		
(3) Points of Attention Regarding the		
Provision of Documents at Contract	_	_

Signing	
(i) In the case of joint investment, the	
"contents and amounts of customers"	
assets related to discretionary investment	
contracts," as specified under Article	
107(1)(vi) of the FIB Cabinet Office	
Ordinance, include the total amount of	
joint investment assets at the time of the	
start of the joint investment and the	
shares of the relevant customers' assets	
in the joint investment assets.	
(ii) The "methods of investment and types of	
transactions," as specified under Article	
107(1)(viii) of the FIB Cabinet Office	
Ordinance, include specific investment	
methods (including the individual	
investment method, the common	
investment method and the joint	
investment method) and also include the	
following items in the case of common	
investment and joint investment:	
A. In the case of common investment	
a. Items regarding the asset	
administration organization in	
charge of common investment	
assets	
b. Items regarding the criteria for the	
allocation of assets acquired	
through the common investment	
B. In the case of joint investment	
a. Items regarding the size of joint	
investment assets	
b. Customers' attributes and types of	
customer assets and items	
regarding the criteria for joint	
investment	
c. Items regarding the asset	
administration organization in	
charge of joint investment assets	
d. Items regarding the criteria for the	
allocation of assets acquired	
through the joint investment	
e. Items regarding the evaluation	
method of join investment assets	
and the calculation method of each customer's interests in the assets	
(including cases where assets are	
withdrawn from the joint investment	
prematurely).	
(iii) The "methods of investment and types of	
transactions," as specified under Article	
107(1)(viii) of the FIB Cabinet Office	
Ordinance, include re-entrusted entities' methods of investment and types of	
transaction.

Duty of Loyalty and Measures to Prevent Internal Collusion (the Guidelines for Supervision VI-2-2-3(1) to (3))

		internal rule
(1) Points of Attention Regarding		
Discretionary Investment Business		
Operators Engaging in Two or More		
Types of Business		
When supervisors examine the		
appropriateness of measures taken by		
a discretionary investment business		
operator engaging in two or more		
types of business (as specified under	_	_
Article 29-2(1)(v) of the FIEA) to		
prevent internal collusion, they shall		
pay attention to the following points,		
for example, depending on the nature		
of its business, from the viewpoint of		
preventing conflicts of interests and		
ensuring the appropriateness of		
business operations in other ways.		
(i) Whether the discretionary investment		
business operator has taken appropriate		
measures to prevent collusion between		
its different types of business, such as		
establishing an internal control system		
and procedures for the prevention of		
such collusion in a manner suited to the		
nature of its business.		
(ii) Regarding the "non-disclosure		
information," as specified under Article		
147(ii) of the FIB Cabinet Office		
· ·		
Ordinance, whether the discretionary		
investment business operator has put in		
place information management		
measures, such as the appointment of		
the relevant manager and the		
establishment of management rules, and		
ensures the effectiveness of information		
management by, for example, properly		
identifying and examining the status of		
the usage of the non-disclosure		
information and revising the		
9		
management method as necessary.		
(2) Points of Attention Regarding		
Prevention of Conflicts of Interests in	_	_
Investment Management Business		
Whether appropriate measures have been		
taken to prevent practices that could		
promote the interests of specific rights		
holders at the expense of other rights		
holders, such as establishing an internal		
control system and procedures for the		
prevention of collusion between different		
types of business in a manner suited to the		
nature of the business.		
(3) Duty of Loyalty to Rights Holders	_	-
It should be kept in mind that if a		
discretionary investment business operator		
causes financial damage to a beneficiary		
due to a clerical error involved in the		
investment of investment assets and fails to		
compensate for the damage, it could		
constitute a violation of the duty of loyalty.		
obnounce a violation of the duty of loyalty.	<u> </u>	

The same shall apply to cases where the	
clerical error occurs at an entity to which	
business operations are entrusted and	
where the discretionary investment business	
operator which has the obligation of duty to	
the beneficiary fails to compensate for the	
damage.	

Selection of Agency/Brokerage Service Providers (the Guidelines for SupervisionVI-2-2-4-1(1))

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(1) Points of Attention Regarding Selection of Agency/Brokerage Service Providers	_	_
(i) When signing contracts for entrusting agency/brokerage services, whether the discretionary investment business operator specifies the significance of the entrustment in relation to governance, identifies the various risks involved therein and conducts sufficient deliberations on the method of risk management.		
(ii) Whether the discretionary investment business operator conducts sufficient deliberations on whether the agency/brokerage service providers have sufficient qualifications to conduct the entrusted business operations in a sound and appropriate manner. In cases where the agency/brokerage service providers concurrently engage in other services in particular, whether the discretionary investment business operator not only examines the possibility of the nature of the other services damaging public confidence in the service providers, but also conducts sufficient deliberations in consideration of the primary business operator's reputational risk. (The "primary business operator investment business operators which sign discretionary investment contracts through agency/brokerage services providers; the same shall apply in VI.)		

Measures Taken by Primary Business Operator to Ensure the Appropriateness of Agency/Brokerage Service Providers (the Guidelines for Supervision VI-2-2-4-2(1) to (4))

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(1) Development of Internal Control Environment for Supervising Agency/Brokerage Service Providers		1
(i) Whether the primary business operator		

has developed a control environment for		
I lias developed a control environment for		
ensuring appropriate supervision of		
agency/brokerage service providers,		
through actions such as establishing a		
division responsible for the		
implementation of measures to ensure		
the sound and appropriate conduct of		
business operations related to		
agency/brokerage services, or		
appointing a person responsible therefor		
(including a control environment		
regarding audits of the business		
operations of agency/brokerage service		
providers).		
(ii) Whether the primary business operator		
has developed an internal control		
environment for examining whether the		
said division or person has taken proper		
measures to ensure the appropriateness		
of the business operations related to the		
agency/brokerage services.		
(2) Points of Attention Regarding		
Measures to Ensure Necessary and		
Appropriate Supervision of	_	_
Agency/Brokerage Service Providers		
(i) Whether the primary business operator		
has taken the following measures in		
order to ensure the sound and		
operations related to agency/brokerage		
services and monitors the status of the		
conduct of the business operations:		
A. To provide guidance regarding		
business operations related to		
agency/brokerage services to		
agency/brokerage services to

brokerage service providers and their employees and implement training programs intended to ensure their compliance with laws and regulations regarding the agency/brokerage services. B. To implement measures to ensure the necessary and appropriate supervision of agency/brokerage service providers, such as examining periodically or as necessary whether the service providers properly conduct the services, including investment solicitation and requiring them to make improvement when necessary. (ii) Whether the primary business operator has developed a control environment that ensures the results of the above monitoring are examined by the primary business operator's division in charge and reported to the management team when necessary, so that they are reflected in the provision of appropriate		

operations by agency/brokerage service providers.		
(3) Measures to Cancel Contracts for Entrusting Agency/Brokerage Services	_	_
Whether the primary business operator has developed a control environment for implementing appropriate measures, such as providing guidance to agency/brokerage service providers and canceling contracts for entrusting agency/brokerage services, when a problem has been found as a result of the monitoring of agency/brokerage service providers. In addition, whether it has developed a control environment for properly protecting customers when canceling the entrustment contracts.		
(4) Measures to Process Complaints	_	_
Whether the primary business operator has established arrangements and procedures for responding to complaints, such as specifying the contact point for customer complaints regarding agency/brokerage services, establishing a division in charge of processing complaints and prescribing procedures for processing complaints.		

Other Points of Attention (the Guidelines for Supervision VI-2-2-5(1) to (3) and (6))

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(1) Accounts for Settlement of		
Transactions	_	
(i) It should be kept in mind that regarding		
transactions made on their own account,		
discretionary investment business		
operators must not use an account		
intended for the settlement of		
transactions that was made through the		
activities specified under the proviso of		
Article 42-5 of the FIEA.		
(ii) It should be kept in mind that		
discretionary investment business		
operators' use of the said account for		
placing orders covering both transactions		
related to investment based on		
investment decisions commissioned by		
customers and transactions made on		
their own account is equivalent to the		
"use of the relevant account for purposes		
other than the settlement of the relevant		
transaction" specified under Article		
130(1)(xi) of the FIB Cabinet Office		
Ordinance.		
(2) Points to consider in the reinvestment		
of cash collateral	_	_
When a discretionary investment		
business operator who is the		

securities lender (and/or its agent) reinvest the cash collateral received in securities lending transactions with collateral, the business operator shall pay attention to the following points only if the said cash collateral reinvested are managed with leverage, accordance with the Recommendation of the "Strengthening Oversight and Regulation of Shadow Banking: Policy Framework for Addressing Shadow Banking Risks in Securities Lending and Repos" published by the FSB (Financial Stability Board) in August 2013. (i) High-level principles A Whether the discretionary investment business operator, in developing its cash collateral reinvestment strategy and investment guidelines, takes into account the possibility that the cash collateral could be recalled at any time by the party that borrowed securities, considers whether the business operator holds assets that sufficiently liquid to meet reasonably foreseeable recalls of cash collateral, and takes measures to manage the associated liquidity risk. B Whether securities lending cash collateral reinvestment is conducted with one of the primary objectives capital preservation. particular, whether cash collateral reinvestment guidelines take into account whether unexpectedly large requests for returning cash collateral could be met if the market for the assets in which the cash collateral has been reinvested became illiquid and liquidating the assets would result in a loss. C Whether cash collateral reinvestment is consistent with the stated and approved investment policy of the discretionary investment business operator as a securities lender, so as not to add substantial incremental risk to the firm's risk profile. In developing and approving cash collateral reinvestment guidelines, whether the discretionary investment business operator takes into account the size of this activity relative to the business operator overall. D Whether investment guidelines (and modifications) subsequent for securities lending cash collateral

reinvestment

are

formally

documented and communicated to	
beneficial owners.	
E Whether the discretionary investment	
business operator explicitly approves,	
formally documents and regularly	
reviews investment guidelines that	
govern cash collateral reinvestment.	
Whether the guidelines comply with	
these high-level principles. Whether	
the discretionary investment business	
operator as a lending agent ensures	
that all its clients have such	
guidelines.	
F Whether assets the discretionary	
investment business operator holds	
to meet cash collateral calls are	
highly liquid with transparent pricing	
so that they can be valued at least on	
a daily basis and sold, if needed, at a	
price close to their pre-sale valuation.	
(ii) Liquidity, credit, and other risks	
A Whether the discretionary investment	
business operator pays attention to	
the following points in reinvesting	
cash collateral.	
a. whether taking measures to limit	
the potential for maturity mismatch.	
b. whether holding assets that are	
sufficiently liquid and low risk to	
meet reasonably foreseeable	
demands for cash collateral	
redemption, together with a buffer	
to guard against stress scenarios.	
c. whether developing an appropriate	
risk management structure	
consistent with the cash collateral	
reinvestment guidelines.	
B Whether the following requirements	
for the cash collateral reinvestment	
portfolio and/or liquidity pool	
maintained to meet cash collateral	
recalls are set and continuously	
complied.	
a. Whether a minimum portion of the	
cash collateral is set for the	
following portfolio that can be	
readily converted to cash over	
short time horizons, such as one	
day and one week, to meet	
potential recalls of cash collateral:	
- Short-term deposits (with high-	
quality financial institutions),	
- Highly liquid short-term assets	
(such as high quality	
government treasury bills and	
bonds), and	
- Short tenor transaction (such as	
overnight or open reverse repos	
backed by highly liquid assets).	
b. Whether the discretionary	
investment business operator sets	

specific limits for the weighted	
average maturity (WAM) and/or	
weighted average life (WAL) of the	
portfolio in which the cash	
collateral is reinvested.	
c. Whether the discretionary	
investment business operator sets	
maximum limits for the remaining	
term to maturity for any single	
investment in which the cash	
collateral is reinvested, which	
could vary by asset class based on	
the liquidity of the instruments.	
(iii) Stress test	
` '	
A Whether the discretionary investment	
business operator stress tests its	
ability to meet foreseeable and	
unexpected calls for the return of	
cash collateral on an ongoing basis.	
B Whether these stress tests stated in	
(i) above include an assessment of	
the business operator's ability to	
liquidate part or the entire	
reinvestment portfolio under a range	
of stressed market scenarios,	
including:	
a. interest rate changes,	
b. higher cash collateral recalls from	
securities borrowers,	
c. higher redemptions by investors in	
the funds being lent, and	
d. changes in the credit quality of the	
portfolio in which the cash	
collateral is reinvested.	
(iv) Disclosure	
A Whether the discretionary investment	
business operator as an agent	
securities lender frequently discloses	
to their clients (the beneficial owners	
`	
of securities) the composition and	
valuation of their portfolio of	
securities on loan and their cash	
collateral reinvestment portfolio.	
B Whether the disclosure stated in (i)	
above includes, at a minimum, the	
following items:	
a. the percentage of assets held in	
cash or cash equivalents over a	
one day and one week liquidation	
horizon;	
b. the WAM and WAL of the portfolio	
in which the cash collateral is	
reinvested;	
c.the maximum remaining term to	
maturity of any individual	
investment;	
d.the percentage of assets that are	
held in illiquid securities (and how	
these are defined);	

 individual security, 		
- issuer, and		
- asset type;		
f. the split between secured and		
unsecured exposures;		
g. the distribution of collateral		
received in reverse repo;		
h. the average yield of the portfolio in		
which the cash collateral is		
reinvested; and		
 results from liquidity stress tests. 		
(3) Points to consider in repo-type		
transactions		
When the discretionary investment		
business operator engages in the		
lending and borrowing of securities,		
or the sale or purchase of securities		
on condition of repurchase or resale,		
with collateral (hereinafter referred to		
as "repo-type transactions")		
(including cases where the		
discretionary investment business		
operator is an agent), whether it		
establishes internal rules in regard to	_	
the assessment and management of		
collaterals covering the following		
items, in accordance with the		
Recommendation 9 of the		
"Strengthening Oversight and		
Regulation of Shadow Banking: Policy		
Framework for Addressing Shadow		
Banking Risks in Securities Lending		
and Repos" published by the FSB		
(Financial Stability Board) in August		
2013.		
(i) Collateral types		
Whether the discretionary investment		
business operator, in conducting repo-		
type transactions, only takes collateral		
types that they are able following a		
counterparty failure to:		
A hold for a period without breaching		
laws or regulations;		
B value; and		
B value; and C risk manage appropriately.		
B value; and C risk manage appropriately. (ii) Contingency plan		
B value; and C risk manage appropriately. (ii) Contingency plan A Whether the discretionary investment		
B value; and C risk manage appropriately. (ii) Contingency plan A Whether the discretionary investment business operator has contingency		
B value; and C risk manage appropriately. (ii) Contingency plan A Whether the discretionary investment business operator has contingency plans for the failure of their largest		
B value; and C risk manage appropriately. (ii) Contingency plan A Whether the discretionary investment business operator has contingency plans for the failure of their largest market counterparties, including in		
B value; and C risk manage appropriately. (ii) Contingency plan A Whether the discretionary investment business operator has contingency plans for the failure of their largest		
B value; and C risk manage appropriately. (ii) Contingency plan A Whether the discretionary investment business operator has contingency plans for the failure of their largest market counterparties, including in		
B value; and C risk manage appropriately. (ii) Contingency plan A Whether the discretionary investment business operator has contingency plans for the failure of their largest market counterparties, including in times of market stress.		
B value; and C risk manage appropriately. (ii) Contingency plan A Whether the discretionary investment business operator has contingency plans for the failure of their largest market counterparties, including in times of market stress. B Whether these plans stated in (i)		
B value; and C risk manage appropriately. (ii) Contingency plan A Whether the discretionary investment business operator has contingency plans for the failure of their largest market counterparties, including in times of market stress. B Whether these plans stated in (i) above include: a. how the discretionary investment		
B value; and C risk manage appropriately. (ii) Contingency plan A Whether the discretionary investment business operator has contingency plans for the failure of their largest market counterparties, including in times of market stress. B Whether these plans stated in (i) above include: a. how the discretionary investment business operator would manage		
B value; and C risk manage appropriately. (ii) Contingency plan A Whether the discretionary investment business operator has contingency plans for the failure of their largest market counterparties, including in times of market stress. B Whether these plans stated in (i) above include: a. how the discretionary investment business operator would manage the collateral following default; and		
B value; and C risk manage appropriately. (ii) Contingency plan A Whether the discretionary investment business operator has contingency plans for the failure of their largest market counterparties, including in times of market stress. B Whether these plans stated in (i) above include: a. how the discretionary investment business operator would manage the collateral following default; and b. the capabilities to liquidate the		
B value; and C risk manage appropriately. (ii) Contingency plan A Whether the discretionary investment business operator has contingency plans for the failure of their largest market counterparties, including in times of market stress. B Whether these plans stated in (i) above include: a. how the discretionary investment business operator would manage the collateral following default; and b. the capabilities to liquidate the collateral in an orderly way.		
B value; and C risk manage appropriately. (ii) Contingency plan A Whether the discretionary investment business operator has contingency plans for the failure of their largest market counterparties, including in times of market stress. B Whether these plans stated in (i) above include: a. how the discretionary investment business operator would manage the collateral following default; and b. the capabilities to liquidate the collateral in an orderly way. (iii) Margin call		
B value; and C risk manage appropriately. (ii) Contingency plan A Whether the discretionary investment business operator has contingency plans for the failure of their largest market counterparties, including in times of market stress. B Whether these plans stated in (i) above include: a. how the discretionary investment business operator would manage the collateral following default; and b. the capabilities to liquidate the collateral in an orderly way.		

(6) Points of Attention for Discretionary Investment Contracts under the Provisions of the Employees' Pension Insurance Act (i) Considering that a surviving employees' pension fund (refers to the surviving employees' pension fund as prescribed in Article 3, item (xi) of the Supplementary Provisions of the Act for Partial Revision of the Employees' Pension Insurance Act to Ensure the Soundness and Reliability of the Public Pension System (Cabinet Order No. 63 of 2013); the same shall apply hereinafter) as a customer is obligated to make an effort to invest reserves for pension benefits, etc., using methods which are not concentrated on a specific means in accordance with the provisions of Article 39-15 (1) of the Cabinet Order for Employees' Pension Fund prior to abolition pursuant to the provisions of Article 10 of the Cabinet Order Concerning the Coordination, etc. of the Relevant Cabinet Orders Related to the Relevant Cabinet Orders Related to the Relevant Cabinet Order No. 73 of 2014) that is deemed to be still in effect in accordance with the provisions of Article 3(2) of the Cabinet Order Concerning Transitional Measures due to the Enforcement of the Act for Partial Revision of the Employees' Pension Insurance Act to Ensure the Soundness and Reliability of the Public Pension System (Cabinet Order No. 73 of 2014) that is deemed to be still in effect in accordance with the provisions of Article 3(2) of the Cabinet Order Concerning Transitional Measures due to the Enforcement of the Act for Partial Revision of the Employees' Pension Insurance Act to Ensure the Soundness and Reliability of the Public Pension System (Cabinet Order No. 74 of 2014) (hereinafter the "duty of investment diversification,") if it is recognized that the surviving employees' pension fund could have not fulfilled their duty of investment diversification, whether the discretionary investment business operator has astablished an appropriate control environment to give a notice to the surviving employees' pension fund to ask the fund for	B Whether margin calls (referred to as the right to claim a recovery of collateral deficiency resulting from marking-to-market at any time) are made at least daily.		
(i) Considering that a surviving employees' pension fund (refers to the surviving employees' pension fund as prescribed in Article 3, item (xi) of the Supplementary Provisions of the Act for Partial Revision of the Employees' Pension Insurance Act to Ensure the Soundness and Reliability of the Public Pension System (Cabinet Order No. 63 of 2013); the same shall apply hereinafter) as a customer is obligated to make an effort to invest reserves for pension benefits, etc., using methods which are not concentrated on a specific means in accordance with the provisions of Article 39-15 (1) of the Cabinet Order for Employees' Pension Fund prior to abolition pursuant to the provisions of Article 1 of the Cabinet Order Concerning the Coordination, etc. of the Relevant Cabinet Orders Related to the Enforcement of the Act for Partial Revision of the Employees' Pension Insurance Act to Ensure the Soundness and Reliability of the Public Pension System (Cabinet Order No. 73 of 2014) that is deemed to be still in effect in accordance with the provisions of Article 3(2) of the Cabinet Order Concerning Transitional Measures due to the Enforcement of the Act for Partial Revision of the Employees' Pension Insurance Act to Ensure the Soundness and Reliability of the Public Pension System (Cabinet Order No. 73 of 2014) that is deemed to be still in effect in accordance with the provisions of Article 3(2) of the Cabinet Order Concerning Transitional Measures due to the Enforcement of the Act for Partial Revision of the Employees' Pension Insurance Act to Ensure the Soundness and Reliability of the Public Pension System (Cabinet Order No. 74 of 2014) (hereinafter the "duty of investment diversification, whether the discretionary investment business operator has established an appropriate control environment to give a notice to the surviving employees' pension fund. In the case that the notice is given but there is still a risk of violation of the duty of investment diversification, whether the discretionary investment business operat	Investment Contracts under the Provisions of the Employees' Pension	_	_
investment management guideline, for	(i) Considering that a surviving employees' pension fund (refers to the surviving employees' pension fund as prescribed in Article 3, item (xi) of the Supplementary Provisions of the Act for Partial Revision of the Employees' Pension Insurance Act to Ensure the Soundness and Reliability of the Public Pension System (Cabinet Order No. 63 of 2013); the same shall apply hereinafter) as a customer is obligated to make an effort to invest reserves for pension benefits, etc., using methods which are not concentrated on a specific means in accordance with the provisions of Article 39-15 (1) of the Cabinet Order for Employees' Pension Fund prior to abolition pursuant to the provisions of Article 1 of the Cabinet Order Concerning the Coordination, etc. of the Relevant Cabinet Orders Related to the Enforcement of the Act for Partial Revision of the Employees' Pension Insurance Act to Ensure the Soundness and Reliability of the Public Pension System (Cabinet Order No. 73 of 2014) that is deemed to be still in effect in accordance with the provisions of Article 3(2) of the Cabinet Order Concerning Transitional Measures due to the Enforcement of the Act for Partial Revision of the Employees' Pension Insurance Act to Ensure the Soundness and Reliability of the Public Pension System (Cabinet Order No. 74 of 2014) (hereinafter the "duty of investment diversification"), if it is recognized that the surviving employees' pension fund could have not fulfilled their duty of investment diversification, whether the discretionary investment business operator has established an appropriate control environment to give a notice to the surviving employees' pension fund. In the case that the notice is given but there is still a risk of violation of the duty of investment diversification, whether the discretionary investment business operator has had a consultation with the surviving employees' pension fund to ask the fund to examine the change of their		

example. Furthermore, if there is still a	
risk of violation of the duty of investment	
diversification even after the	
consultation, whether the discretionary	
-	
investment business operator has taken	
measures, including the examination of	
cancellation of the discretionary	
investment contract in the worst case, for	
example, in order to ensure that the	
surviving employees' pension fund will	
fulfill their duty of investment	
diversification.	
 Whether the discretionary investment	
business operator understands the	
knowledge, experience, state of assets	
of the surviving employees' pension fund,	
and their purpose of concluding a	
discretionary investment contract. In a	
case where an investment management	
guideline is indicated by the surviving	
employees' pension fund and it is found	
necessary, whether the discretionary	
investment business operator has	
established an appropriate control	
environment in which the discretionary	
investment business operator explains to	
the surviving employees' pension fund	
about risks which might occur if	
investment is made according to the	
•	
investment management guideline.	
n a case where a surviving employees'	
pension fund gives instructions about the	
management of investment assets	
(hereinafter the "specific instructions"),	
such as the acquisition or disposition of	
specific bonds, stocks, beneficiary	
securities, etc., in violation of the	
provision of Article 30(3) of the Cabinet	
Order for Employees' Pension Fund prior	
· · ·	
to abolition, whether the discretionary	
investment business operator has	
established an appropriate control	
environment to ensure compliance with	
Article 130(1)(xiii) of the FIB Cabinet	
Office Ordinance and informs the	
surviving employees' pension fund of the	
inability to follow such instructions, for	
example. Whether the discretionary	
investment business operator has	
•	
established an appropriate control	
environment to avoid such solicitation of	
products or explanations which	
encourage a surviving employees'	
pension fund to give specific instructions.	
The following acts don't violate Article	
130(1)(xiii) of the FIB Cabinet Office	
Ordinance:	
instructions from a surviving	
employees' pension fund: (i)	
instructions on the acquisition, etc., of	

an affiliated fund of the discretionary	
investment business operator (a	
founder or manager of the fund is the	
discretionary investment business	
operator, a parent corporation, etc., as	
specified under Article 1(3)(xiv) of the	
FIB Cabinet Office Ordinance,	
subsidiary corporation, etc., as	
specified under item xvi of the same	
paragraph, or a related foreign	
, , ,	
corporation, etc., as specified under	
Article 126(iii) of the same ordinance)	
(including the case where instructions	
are clarified in the investment	
management guideline, contracts,	
etc.); (ii) instructions to prohibit the	
acquisition of securities of certain	
descriptions; and (iii) instructions on	
the investment management policy,	
such as limitations of investment	
ratios for each description of securities	
or for each industry.	
- In a case where the discretionary	
investment business operator intends	
to invest in securities of certain	
descriptions (subject securities as	
specified under Article 96(4) of the FIB	
Cabinet Office Ordinance) based on a	
discretionary investment contract after	
having concluded the contract, make	
a description and an explanation of	
the securities in pre-contract	
documents which are delivered to a	
surviving employees' pension fund when conducting solicitation for a	
discretionary investment contract.	
·	
(iv) In a case where the discretionary	
investment business operator visits a	
surviving employees' pension fund as	
customer together with a financial	
instruments business operator for the	
purpose of explaining about investment	
performance, whether the discretionary	
investment business operator has	
established an appropriate control	
environment to ensure that such	
explanations, etc., at the time of visit will	
not include solicitation of products, etc.,	
which are structured by the financial	
instruments business operator and will	
not encourage the surviving employees'	
pension fund to give specific instructions.	
(v) With respect to the investment	
management of reserves for pension	
benefits, etc., whether the discretionary	
investment business operator has	
established an appropriate control	
environment to ensure that conclusive	
judgment with respect to an uncertain	
matter will not be provided to a surviving	
employees' pension fund, or information	
employees pension lund, or iniormation	

which is likely to have a surviving	
employees' pension fund mistakenly	
believe an uncertain matter as being	
certain will not be provided to the	
surviving employees' pension fund.	
(vi)For the purpose of making persons in	
charge of important operations	
concerning fund assets and	
management thereof comply with	
requirements for due diligence and	
continuous monitoring as specified under	
Article 96(2)(ii) of the FIB Cabinet Office	
Ordinance, whether the discretionary	
investment business operator has	
established, as necessary, an	
appropriate control environment by which	
internal rules, operation manuals, etc.,	
incorporating detailed standards or	
methods are established, and the status	
of due diligence and the conditions of	
monitoring are examined by the	
compliance division and the risk	
management division.	
(Note) Discretionary investment business	
operators are required to make an	
explanation of risks to surviving	
employees' pension funds as	
customers. However, it must be noted	
that discretionary investment business	
operators cannot be exempted from a	
good manager's duty of care simply	
because they have explained about	
risks involved.	1

2. Investment trust management business, etc.

Control Environment for Business Execution (the Guidelines for Supervision VI-2-3-1(1) and (2))

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(1) Investment and Administration of Investment Assets For the purpose of encouraging medium- to long-term asset building by households in accordance with their stages of life and raising the flow of financial assets from household into growing businesses through financial markets, investment assets, which mediates between them, can play a significant role. As such, it is hoped that investment trust management companies, etc., actively develop and provide products that support stable asset building based on customer needs. With such hopes in mind, supervisors shall examine whether an investment trust management company, etc., is properly managing		

and administering investment assets,
by paying attention to the following
points. It should be noted that the
following points should be taken into consideration in a comprehensive
manner in light of the nature and size
of the company's business and that
failure to meet some of the criteria
should not automatically be deemed
to mean that the investment and
administration of investment assets are inappropriate.
(i) Whether the investment trust
management company, etc., has
properly specified the matters regarding
internal organization that decide its
investment policy (including a specific
decision-making process). (ii) Whether the investment trust
(ii) Whether the investment trust management company, etc., has
prescribed a specific investment method
for investment of investment assets by
the investment division. Whether the
investment management company is
making efforts to clearly present
information regarding the status of asset management of the relevant investment
trust, such as listed below, to
beneficiaries, etc., in a manner
appropriate to the characteristics of
individual investment trust products.
Whether the investment management
company is making efforts to clearly present information on investment trust
products that use a fund-of-funds
strategy to beneficiaries, etc.,, such as
providing an overview of the destination
funds (e.g. key invested assets) and the
net contribution rate that incorporates the
asset-management costs of the
destination funds, as well as providing financial instruments business operators
that sell the investment trust products
with information about asset
management costs.
A. Information about fund managers
(e.g. years of experience in
managing investment funds, personal
history, etc. of the chief fund manager, overview of management
team, etc.)
B. Process of investment decision
making in putting the basic
investment policy into actual
operation
(iii)Whether the investment trust management company, etc., has
management company, etc., has developed an appropriate control
environment regarding the management
of securities transactions between
various investment assets and between

investment assets and its own assets or	
third-party assets.	
(iv)In cases where the investment trust	
management company entrusts all or	
part of the authority over the investment	
made on behalf of rights holders to	
another entity under Article 42-3 of the	
FIEA (including cases where the	
entrusted entity entrusts part of the	
authority to yet another entity), whether	
the investment trust management	
company has properly established the criteria for selecting the entity to which	
the authority is entrusted and the method	
of communications therewith. Whether	
the investment trust management	
company has established arrangements	
and procedures for continuously	
examining the entrusted entity's	
business execution capability and its	
compliance with contract provisions.	
Whether it has specified measures to be	
taken when a problem is found in the	
entrusted entity's business execution	
capability (e.g., providing guidance for	
business improvement and refusing to	
renew the entrustment contract).	
(v) Regarding the selection of the entities to	
which orders are placed and business	
operations are entrusted, whether the	
investment trust management company,	
etc., has properly specified the matters	
concerning the entities' transaction	
execution capability, control environment for legal compliance, credit risk and	
trading costs as items that should be	
taken into consideration.	
(vi)Whether the investment trust	
management company, etc., has	
arrangements and procedures for a	
division independent from the investment	
division to periodically examine whether	
investment assets are properly invested	
(including whether records on the	
investment status are stored), including	
whether the investment decision process	
is appropriate, in accordance with	
investment trust contracts and asset	
investment contracts and the investment	
guideline.	
(vii)With respect to MRFs (referring to bond	
investment trusts prescribed in Article	
25(ii) of the Ordinance for Enforcement of the Investment Trust Act; the same	
shall apply in (vii) below), while	
compensating part or all of losses	
incurred on the principal, done with the	
purpose of avoiding a sudden and	
unexpected fall in the value of bond	
holdings, etc. where the standard price	
falls below 1 yen per unit and affects	

individual investors' securities		
transactions, is permitted (as provided in		
Article 42-2(vi) of the FIEA and Article		
129-2 of the FIB Cabinet Office		
Ordinance), whether the discretionary		
1		
investment business operator, in an		
effort to avoid stable management of		
MRF, soundness of investment trust		
management companies, etc. from being		
affected, complies with investment limits		
for stable MRF management prescribed		
in "Rules Regarding Management of		
MMF, etc.", the Investment Trusts		
Association's self-regulatory rules, in		
managing MRFs.		
(2) Execution of Transactions		
When investment trust management		
companies, etc., execute transactions,		
1		
they are required to select the		
transaction form that benefits rights		
holders most by taking into		
consideration the transaction price		
•		
and other execution costs in a		
comprehensive manner. In light of the	_	
increasing diversification of the		
•		
transaction forms due to the advance		
of financial techniques, supervisors		
shall examine the status of the		
transaction execution of an		
investment trust management		
company, etc., by paying attention to		
the following points, for example:		
(i) At-Average-Price Transaction (transaction		
made at the average of prices of various		
orders of the same transaction and		
delivery dates, aggregated by issue and		
order category (sell or buy))		
A. Separation of Divisions		
Whether the investment trust		
_		
management company, etc., has		
separate divisions for making		
investment divisions and for taking		
orders. In cases where		
organizational separation is difficult,		
whether, at the minimum, different		
persons are responsible for these		
two tasks.		
B. Examination of Transactions		
Whether the investment trust		
management company, etc., has a		
control environment for ensuring that		
_		
a relevant management division, for		
example, examines the whole range		
of business processes related to at-		
average-price transactions.		
average-directions.	l l	
j .		
C. Disclosure to Rights Holders and		
C. Disclosure to Rights Holders and		
C. Disclosure to Rights Holders and Consent thereof (Limited to		
C. Disclosure to Rights Holders and Consent thereof (Limited to Transactions Related to Asset		
C. Disclosure to Rights Holders and Consent thereof (Limited to		
C. Disclosure to Rights Holders and Consent thereof (Limited to Transactions Related to Asset Investment Contracts with		
C. Disclosure to Rights Holders and Consent thereof (Limited to Transactions Related to Asset		

management company, etc., makes	
at-average-price transactions after	
making prior disclosure to rights	
holders and obtaining their consent.	
In cases where the investment trust	
management company, etc., places	
orders involving proportional	
_ · · ·	
transactions with regard to two or	
more investment asset accounts,	
whether it provides rights holders	
with appropriate explanations	
regarding the criteria for allocation in	
the case of the total executed	
transaction volume falling short of	
the total order volume.	
(ii) Transactions Made via Bulk Orders	
In cases where the investment trust	
management company, etc., places a	
bulk sell or buy order for the same issue	
on behalf of two or more investment	
asset accounts, and allocates the	
executed transactions to each asset	
account based on the allocation criteria	
prescribed by the business operator	
after aggregating the transactions by	
issue and by buy/sell order, whether it	
has developed a control environment	
similar to the one described in (i) above	
from the viewpoint of ensuring fairness	
among various investment assets.	
(iii)Transactions Made between Investment	
Assets Accounts	
Transactions made between	
investment asset accounts are in	
principle prohibited because there is a	
risk that investors in one of the funds	
involved in the transactions may receive	
unfavorable treatment and that such	
transactions may be utilized in acts that	
go against investor protection such as	
transfers of profits between the funds.	
On the other hand, of transactions	
specified under Article 129(1)(i) of the	
FIB Cabinet Office Ordinance, if a	
transaction between investment assets	
accounts falls under a case where the	
prohibition of transactions between	
·	
investment assets accounts does not	
apply, the relevant management division	
is required to be adequately prepared to	
verify that the transactions meet the	
requirements in (a) and (b) of Article	
129(1)(i).	
The "case where it is deemed to be	
necessary and rational," as specified by	
Article 129(1)(i)(a)(4) of the FIB Cabinet	
Office Ordinance, is a case in which	
transactions between investment assets	
accounts executed by investment trust	
management companies meet the need	

to ensure fairness among customers and fulfill its duties of best execution and loyalty to customers, and this applies to transactions in which relevant "sell" or "buy" decisions by both of the funds executing the transactions between investment assets accounts are deemed necessary and rational, and that such transactions are executed in the best possible manner for the investment decisions made thus (or the transactions executed to follow the best execution practice results in offsetting possible losses involved in such transactions).

In determining whether there is necessity and rationality, factors such as the investment policy and investment plans of the funds involved (including inhouse investment limits introduced by the investment trust management companies for the purpose of risk management, etc.), inflow or outflow of money associated with cancellation/formation of funds (including whether there is the need to sell or buy assets in order to maintain portfolios of individual funds, etc.), etc. are considered.

On the other hand, from the viewpoint of best execution practice, factors such as transaction costs, mitigation of market impact, etc. are considered in addition to transaction prices.

From the above viewpoints, such transactions as listed below are considered as ones in which fairness among funds and fair price formation are ensured and as constituting a "case where it is deemed to be necessary and rational." (It must be noted, however, that these are shown only as examples and not the only ones that qualify.)

- A. To have traders execute transactions based on investment decisions made by several fund managers (limited to transactions regarding which there is not the risk of the price formation process being distorted in light of liquidity and other factors related to the relevant issue and, in cases where the transactions are executed by the same trader, the trader has no discretion over execution).
- B. To place both market buy and sell orders before the market's opening (limited to orders which have no risk of distorting the price formation process in light of liquidity and other factors related to the relevant issue).
- C. To place both buy and sell orders in intraday trading at a reasonable interval (limited to orders which have no risk of distorting the price

	formation process in light of liquidity	
	and other factors related to the	
	relevant issue).	
	D. To make transactions related to index	
	funds executed through program	
	trading based on contracts and trust	
	contract provisions (limited to	
	transactions which have no risk of	
	distorting the price formation process	
	in light of liquidity and other factors	
	related to the relevant issue).	
	E. To make VWAP transactions and	
	discretionary transactions, regarding	
	which the decision on the timing of	
	order placement, price and other	
	execution terms related to individual	
	issues are entrusted by the	
	investment trust management	
	company, etc., to a third-party entity	
	(limited to transactions which have	
	no risk of distorting the price	
	formation process in light of liquidity	
	and other factors related to the	
	relevant issue).	
	F. To make futures transactions,	
	regarding which it is difficult to avoid	
	the placement of orders for the same	
	issue because of the small number of	
	issues available for futures trading	
	(limited to transactions which have no risk of distorting the price	
	formation process in light of liquidity	
	and other factors related to the	
	relevant issue).

Control Environment for Customer Solicitation and Explanations for Beneficiaries, etc. (the Guidelines for Supervision VI-2-3-2(1) and (2))

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(1) Prohibition of Advertisements Using Exaggerated Descriptions	1	_
(i) Whether the investment trust management company, etc., includes in its advertisements descriptions indicating that the performance, contents and method of its investment are markedly superior to those of other Financial Instruments Business Operators without providing the basis therefor.		
(ii) When including investment performance data in its advertisement, whether the investment trust management company, etc., uses descriptions that could cause misunderstanding by investors, by putting excessive emphasis on specific parts of the performance. (When investment performance data is included in an advertisement, appropriate and easy-to-understand descriptions must be		

used, from the viewpoint of protecting		
acca, nom the viewpoint of protecting		
investors. For example, it is necessary to		
examine whether the advertisement		
specifies the method of investment		
evaluation and the basis for the use of		
benchmarks and properly expresses that		
the investment performance data is an		
indicator that concerns past results but		
does not promise future performance.)		
(iii)When including investment simulation in		
its advertisement, whether the		
investment trust management company,		
etc., uses descriptions that could cause		
misunderstandings by investors by, for		
example, setting arbitrary assumptions.		
(When investment simulation is included		
in an advertisement, appropriate and		
easy-to-understand descriptions must be		
made, from the viewpoint of protecting		
investors. For example, it is necessary to		
examine whether the advertisement		
specifies the basis for the use of		
·		
assumptions in the simulation and		
properly indicates that the simulation is

tenant management operations, such as
the renewal of real estate-related rental
contracts with tenants and receipts of
rents, but does not include the
entrustment of the building security and
maintenance operations to outside
specialist business operators.

Duty of Loyalty and Measures to Prevent Internal Collusion (the Guidelines for Supervision VI-2-3-3(1) to (3))

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(1) Points of Attention Regarding Investment Trust Management Companies, etc., Engaging in Two or More Types of Business When supervisors examine the appropriateness of measures taken by an investment trust management company, etc., which is engaging in two or more types of business (as specified under Article 29-2(1)(v) of the FIEA), to prevent internal collusion, they shall pay attention to the following points, for example, depending on the nature of its business, from the viewpoint of preventing conflicts of interests and ensuring the appropriateness of business operations in other ways.		
(i) Whether the investment trust management company, etc., has taken appropriate measures to prevent collusion between its different types of business, such as establishing an internal control system and procedures for the prevention of such collusion in a manner suited to the nature of its business.		
(ii) Regarding the "non-disclosure information," as specified under Article 147(ii) of the FIB Cabinet Office Ordinance, whether the investment trust management company, etc., has put in place information management measures, such as the appointment of the relevant manager and the establishment of management rules, and ensures the effectiveness of information management by, for example, properly identifying and examining the status of the usage of the non-disclosure information and revising the management method as necessary.		
(2) Points of Attention Regarding Prevention of Conflicts of Interest in Investment Management Business	_	_
Whether appropriate measures have been taken to prevent practices that could		

promote the interests of specific rights holders at the expense of other rights holders, such as establishing an internal control system and procedures for the prevention of internal collusion between different types of business in a manner suited to the nature of the business.	
(3) Duty of Loyalty to Rights Holders	
It should be kept in mind that if an investment trust investment company, etc., causes financial damage to a rights holder due to a clerical error involved in the investment of investment assets and fails to compensate for the damage, it could constitute a violation of the duty of loyalty. The same shall apply to cases where the clerical error occurs at an entity to which business operations are entrusted and where the investment trust management company, etc., which has the obligation of duty to the rights holder fails to compensate for the damage.	

Business Continuity Management (BCM) (the Guidelines for Supervision VI-2-3-4(2))

have not for the manner of an autions	
been set for the recovery of operations	
vital for the maintenance of the lives of	
customers, economic activities and the	
functions of the financial instruments	
markets (as a consequence of an order	
cancellation request regarding an	
investment trust (including MMFs and	
MRFs): aggregation of the number of	
cancelled units, communications	
business (such as the receipt of	
notification from a sales company	
regarding cancellation, aggregation, and	
notification to the entrusted bank),	
calculation of the base value,	
announcements, identification of the	
· · · · · · · · · · · · · · · · · · ·	
existing position, minimum investment	
instructions, and cancellation operations	
related to direct customers (point-of-	
contact services such as receiving	
cancellations from direct customers);	
and, for executing these business	
operations: legal responses (including	
the preparation and submission of a	
securities registration statement),	
organizational management, systems	
management, and crisis management	
(including the business of providing	
explanations to customers) through	
provisional measures such as manual	
operations and processing by back-up	
centers).	
(v) Whether the investment trust	
management company obtains the	
approval of the board of directors when it	
adopts the BCM and makes important	
revisions. Whether the BCM is subjected	
to examination by independent entities,	
such as internal and external audits.	
(Reference)	
"Development of BCM at Financial	
Institutions" (BOJ, July 2003)	
"Basic Principles on Business Continuity"	
(Joint Forum, August 2006)	
In addition, examination of the BCM and	
BCP shall basically be conducted with	
reference given to III-2-9.	

Other Points of Attention (the Guidelines for Supervision VI-2-3-5) (the Guidelines for Supervision VI-2-2-5(2) and (3))

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(2) Points to consider in the reinvestment of cash collateral When a investment trust management companies, etc. who is the securities lender (and/or its agent) reinvest the cash collateral received in securities lending transactions with	-	ı

collateral, the business operator shall pay attention to the following points only if the said cash collateral reinvested are managed with leverage, accordance with the Recommendation 6 of the "Strengthening **Oversight** and Regulation of Shadow Banking: Policy Framework for Addressing Shadow Banking Risks in Securities Lending and Repos" published by the FSB (Financial Stability Board) in August 2013. (i) High-level principles A Whether investment management companies, etc., in developing its cash collateral reinvestment strategy and investment guidelines, takes into account the possibility that the cash collateral could be recalled at any time by the party that borrowed securities, considers whether the business operator holds assets that are sufficiently liquid to meet reasonably foreseeable recalls of cash collateral, and takes measures to manage the associated liquidity risk. B Whether securities lending cash collateral reinvestment is conducted with one of the primary objectives beina capital preservation. particular, whether cash collateral reinvestment guidelines take into account whether unexpectedly large requests for returning cash collateral could be met if the market for the assets in which the cash collateral has been reinvested became illiquid and liquidating the assets would result in a loss. C Whether cash collateral reinvestment is consistent with the stated and approved investment policy of the trust management investment companies, etc. as a securities lender, so as not to add substantial incremental risk to the firm's risk profile. In developing and approving collateral reinvestment cash guidelines, whether the investment trust management companies, etc. takes into account the size of this activity relative to the business operator overall. D Whether investment guidelines (and modifications) subsequent for securities lending cash collateral reinvestment are formally documented and communicated to beneficial owners.

E Whether the investment trust management companies, etc. explicitly approves, formally documents and regularly reviews investment guidelines that govern collateral reinvestment. cash Whether the guidelines comply with these high-level principles. Whether the investment trust management companies, etc. as a lending agent ensures that all its clients have such quidelines. Whether assets the investment trust management companies, etc. holds to meet cash collateral calls are highly liquid with transparent pricing so that they can be valued at least on a daily basis and sold, if needed, at a price close to their pre-sale valuation. (ii) Liquidity, credit, and other risks A Whether the investment management companies, etc. pays attention to the following points in reinvesting cash collateral. a. whether taking measures to limit the potential for maturity mismatch. b. whether holding assets that are sufficiently liquid and low risk to reasonably foreseeable meet demands for collateral cash redemption, together with a buffer to guard against stress scenarios. c. whether developing an appropriate management structure consistent with the cash collateral reinvestment guidelines. B Whether the following requirements for the cash collateral reinvestment liquidity portfolio and/or pool maintained to meet cash collateral recalls are set and continuously complied. d. Whether a minimum portion of the cash collateral is set for the following portfolio that can be readily converted to cash over short time horizons, such as one day and one week, to meet potential recalls of cash collateral: Short-term deposits (with highquality financial institutions), Highly liquid short-term assets (such as high quality government treasury bills and bonds), and Short tenor transaction (such as overnight or open reverse repos backed by highly liquid assets). e. Whether the investment trust management companies, etc. sets specific limits for the weighted

average maturity (WAM) and/or	
weighted average life (WAL) of the	
portfolio in which the cash	
collateral is reinvested.	
f. Whether the investment trust	
management companies, etc. sets	
maximum limits for the remaining	
term to maturity for any single	
investment in which the cash	
collateral is reinvested, which	
could vary by asset class based on	
the liquidity of the instruments.	
(iii) Stress test	
A Whether the investment trust	
management companies, etc. stress	
tests its ability to meet foreseeable	
and unexpected calls for the return of	
·	
cash collateral on an ongoing basis.	
B Whether these stress tests stated in	
(i) above include an assessment of	
the business operator's ability to	
liquidate part or the entire	
reinvestment portfolio under a range	
of stressed market scenarios,	
including:	
a. interest rate changes,	
b. higher cash collateral recalls from	
securities borrowers,	
c. higher redemptions by investors in	
the funds being lent, and	
d. changes in the credit quality of the	
collateral is reinvested.	
(iv) Disclosure	
A Whether the investment trust	
management companies, etc. as an	
agent securities lender frequently	
discloses to their clients (the	
beneficial owners of securities) the	
composition and valuation of their	
portfolio of securities on loan and	
their cash collateral reinvestment	
portfolio.	
B Whether the disclosure stated in (i)	
above includes, at a minimum, the	
following items:	
a. the percentage of assets held in	
cash or cash equivalents over a	
one day and one week liquidation	
horizon;	
b. the WAM and WAL of the portfolio	
in which the cash collateral is	
reinvested;	
c.the maximum remaining term to	
maturity of any individual	
investment;	
d. the percentage of assets that are	
held in illiquid securities (and how	
these are defined);	
e. the maximum exposure of the fund	
being lent to the following items:	
being left to the following items.	

2 - 12 - 2 1 - 2 1 - 2 2 1		
- individual security,		
- issuer, and		
 asset type; 		
f. the split between secured and		
unsecured exposures;		
g. the distribution of collateral		
received in reverse repo;		
h. the average yield of the portfolio in		
which the cash collateral is		
reinvested; and		
i. results from liquidity stress tests.		
(3) Points to consider in repo-type		
transactions		
When the investment trust		
management companies, etc. engages		
in the lending and borrowing of		
securities, or the sale or purchase of		
securities on condition of repurchase		
or resale, with collateral (hereinafter		
referred to as "repo-type		
transactions") (including cases where		
the investment trust management		
companies, etc. is an agent), whether	_	
it establishes internal rules in regard		
to the assessment and management of		
collaterals covering the following		
items, in accordance with the		
Recommendation 9 of the		
"Strengthening Oversight and		
Regulation of Shadow Banking: Policy		
Framework for Addressing Shadow		
Banking Risks in Securities Lending		
and Repos" published by the FSB		
(Financial Stability Board) in August		
2013.		
(i) Collateral types

are marked to market at least daily.
B Whether margin calls (referred to as
the right to claim a recovery of
collateral deficiency resulting from
marking-to-market at any time) are
made at least daily.

3. Foreign investment trust management business

Control Environment for Business Execution (the Guidelines for Supervision VI-2-3-1(1) and (2))

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(1) Investment and Administration of		
Investment Assets		
For the purpose of encouraging		
medium- to long-term asset building		
by households in accordance with		
their stages of life and raising the flow		
of financial assets from household		
into growing businesses through		
financial markets, investment assets,		
which mediates between them, can		
play a significant role. As such, it is		
hoped that investment trust		
management companies, etc., actively		
develop and provide products that		
support stable asset building based		
on customer needs.		
With such hopes in mind,	_	_
supervisors shall examine whether an		
investment trust management		
company, etc., is properly managing		
and administering investment assets,		
by paying attention to the following		
points. It should be noted that the		
following points should be taken into		
consideration in a comprehensive		
manner in light of the nature and size		
of the company's business and that		
failure to meet some of the criteria		
should not automatically be deemed		
to mean that the investment and		
administration of investment assets		
are inappropriate.		
(i) Whether the investment trust		
management company, etc., has		
properly specified the matters regarding		
internal organization that decide its		
investment policy (including a specific		
decision-making process).		
(ii) Whether the investment trust		
management company, etc., has		
prescribed a specific investment method		
for investment of investment assets by		
the investment division. Whether the		
investment management company is making efforts to clearly present		
, , ,		
information regarding the status of asset		
management of the relevant investment		

trust, such as listed below, to	
beneficiaries, etc., in a manner	
appropriate to the characteristics of	
individual investment trust products.	
Whether the investment management	
company is making efforts to clearly	
present information on investment trust	
products that use a fund-of-funds	
strategy to beneficiaries, etc.,, such as	
providing an overview of the destination	
funds (e.g. key invested assets) and the	
net contribution rate that incorporates the	
asset-management costs of the	
destination funds, as well as providing	
financial instruments business operators	
that sell the investment trust products	
with information about asset	
management costs.	
A. Information about fund managers	
•	
(e.g. years of experience in	
managing investment funds, personal	
history, etc. of the chief fund	
manager, overview of management	
team, etc.)	
B. Process of investment decision	
making in putting the basic	
investment policy into actual	
operation	
(iii)Whether the investment trust	
management company, etc., has	
developed an appropriate control	
environment regarding the management	
of securities transactions between	
various investment assets and between	
investment assets and its own assets or	
third-party assets.	
(iv)In cases where the investment trust	
management company entrusts all or	
part of the authority over the investment	
made on behalf of rights holders to	
another entity under Article 42-3 of the	
FIEA (including cases where the	
entrusted entity entrusts part of the	
authority to yet another entity), whether	
the investment trust management	
company has properly established the	
criteria for selecting the entity to which	
the authority is entrusted and the method	
of communications therewith. Whether	
the investment trust management	
company has established arrangements	
and procedures for continuously	
examining the entrusted entity's	
business execution capability and its	
compliance with contract provisions.	
Whether it has specified measures to be	
taken when a problem is found in the	
entrusted entity's business execution	
capability (e.g., providing guidance for	
business improvement and refusing to	
renew the entrustment contract).	

(v) Regarding the selection of the entities to		
which orders are placed and business		
operations are entrusted, whether the		
investment trust management company,		
etc., has properly specified the matters		
concerning the entities' transaction		
execution capability, control environment		
for legal compliance, credit risk and		
trading costs as items that should be		
taken into consideration.		
(vi)Whether the investment trust		
management company, etc., has		
arrangements and procedures for a		
division independent from the investment		
division to periodically examine whether		
investment assets are properly invested		
(including whether records on the		
investment status are stored), including		
whether the investment decision process		
is appropriate, in accordance with		
investment trust contracts and asset		
investment contracts and the investment		
guideline.		
(vii)With respect to MRFs (referring to bond		
investment trusts prescribed in Article		
25(ii) of the Ordinance for Enforcement		
of the Investment Trust Act; the same		
shall apply in (vii) below), while		
compensating part or all of losses		
incurred on the principal, done with the		
purpose of avoiding a sudden and		
unexpected fall in the value of bond		
holdings, etc. where the standard price		
falls below 1 yen per unit and affects		
individual investors' securities		
transactions, is permitted (as provided in		
Article 42-2(vi) of the FIEA and Article		
129-2 of the FIB Cabinet Office		
Ordinance), whether the investment trust		
management companies, etc., in an		
effort to avoid stable management of		
MRF, soundness of investment trust		
· ·		
management companies, etc. from being		
affected, complies with investment limits		
for stable MRF management prescribed		
in "Rules Regarding Management of		
MMF, etc.", the Investment Trusts		
Association's self-regulatory rules, in		
managing MRFs.		
(2) Execution of Transactions		
When investment trust management		
companies, etc., execute transactions,		
they are required to select the		
transaction form that benefits rights		
holders most by taking into		
consideration the transaction price		_
and other execution costs in a		
comprehensive manner. In light of the		
increasing diversification of the		
transaction forms due to the advance		
of financial techniques, supervisors	<u>l</u>	

shall examine the status of the	
transaction execution of an	
investment trust management	
company, etc., by paying attention to	
the following points, for example:	
(i) At-Average-Price Transaction (transaction	
made at the average of prices of various	
orders of the same transaction and	
delivery dates, aggregated by issue and	
order category (sell or buy))	
A. Separation of Divisions	
Whether the investment trust	
management company, etc., has	
separate divisions for making	
investment divisions and for taking	
orders. In cases where organizational	
separation is difficult, whether, at the	
minimum, different persons are	
responsible for these two tasks.	
B. Examination of Transactions	
Whether the investment trust	
management company, etc., has a	
control environment for ensuring that	
a relevant management division, for	
example, examines the whole range	
of business processes related to at-	
average-price transactions.	
C. Disclosure to Rights Holders and	
Consent thereof (Limited to Transactions Related to Asset	
Investment Contracts with Investment	
Corporations)	
Whether the investment trust	
management company, etc., makes	
at-average-price transactions after	
making prior disclosure to rights	
holders and obtaining their consent. In	
cases where the investment trust	
management company, etc., places	
orders involving proportional	
allocation of the executed transactions	
with regard to two or more investment	
asset accounts, whether it provides	
rights holders with appropriate	
explanations regarding the criteria for	
allocation in the case of the total	
executed transaction volume falling	
short of the total order volume.	
(ii)Transactions Made via Bulk Orders	
In cases where the investment trust	
management company, etc., places a bulk	
sell or buy order for the same issue on	
behalf of two or more investment asset	
accounts, and allocates the executed	
transactions to each asset account based	
on the allocation criteria prescribed by the	
business operator after aggregating the	
transactions by issue and by buy/sell	
order, whether it has developed a control	
environment similar to the one described	
in (i) above from the viewpoint of ensuring	

fairness investment among various assets. (iii)Transactions Made between Investment Assets Accounts Transactions made between investment asset accounts are in principle prohibited because there is a risk that investors in one of the funds involved in the transactions may receive unfavorable treatment and that such transactions may be utilized in acts that go against investor protection such as transfers of profits between the funds. On the other hand, of transactions specified under Article 129(1)(i) of the FIB Cabinet Office Ordinance, if a transaction between investment assets accounts falls under a case where the prohibition of transactions between investment assets accounts does not apply, the relevant management division is required to be adequately prepared to verify that the transactions meet the requirements in (a) and (b) of Article 129(1)(i). The "case where it is deemed to be necessary and rational," as specified by Article 129(1)(i)(a)(4) of the FIB Cabinet Office Ordinance, is a case in which transactions between investment assets accounts executed by investment trust management companies meet the need to ensure fairness among customers and fulfill its duties of best execution and loyalty to customers, and this applies to transactions in which relevant "sell" or "buy" decisions by both of the funds executing the transactions between investment assets accounts are deemed necessary and rational, and that such transactions are executed in the best possible manner for the investment decisions made thus (or the transactions executed to follow the best execution practice results in offsetting possible losses involved in such transactions). In determining whether there necessity and rationality, factors such as the investment policy and investment plans of the funds involved (including inhouse investment limits introduced by the investment trust management companies for the purpose of risk management, etc.), inflow or outflow of money associated with cancellation/formation of funds (including whether there is the need to sell or buy assets in order to maintain portfolios of individual funds, etc.), etc. are considered. On the other hand, from the viewpoint of best execution practice, factors such as transaction costs, mitigation of market impact, etc. are considered in addition to

transaction prices.

From the above viewpoints, such transactions as listed below are considered as ones in which fairness among funds and fair price formation are ensured and as constituting a "case where it is deemed to be necessary and rational." (It must be noted, however, that these are shown only as examples and not the only ones that qualify.)

- A. To have traders execute transactions based on investment decisions made by several fund managers (limited to transactions regarding which there is not the risk of the price formation process being distorted in light of liquidity and other factors related to the relevant issue and, in cases where the transactions are executed by the same trader, the trader has no discretion over execution).
- B. To place both market buy and sell orders before the market's opening (limited to orders which have no risk of distorting the price formation process in light of liquidity and other factors related to the relevant issue).
- C. To place both buy and sell orders in intraday trading at a reasonable interval (limited to orders which have no risk of distorting the price formation process in light of liquidity and other factors related to the relevant issue).
- D. To make transactions related to index funds executed through program trading based on contracts and trust contract provisions (limited to transactions which have no risk of distorting the price formation process in light of liquidity and other factors related to the relevant issue).
- E. To make VWAP transactions and discretionary transactions, regarding which the decision on the timing of order placement, price and other execution terms related to individual issues are entrusted bγ investment trust management company, etc., to a third-party entity (limited to transactions which have no risk of distorting the price formation process in light of liquidity and other factors related to the relevant issue).
- F. To make futures transactions, regarding which it is difficult to avoid the placement of orders for the same issue because of the small number of issues available for futures trading (limited to transactions which have no risk of distorting the price

formation process in light of liquidity
and other factors related to the
relevant issue).

Control Environment for Customer Solicitation and Explanations for Beneficiaries, etc. (the Guidelines for Supervision VI-2-3-2(1))

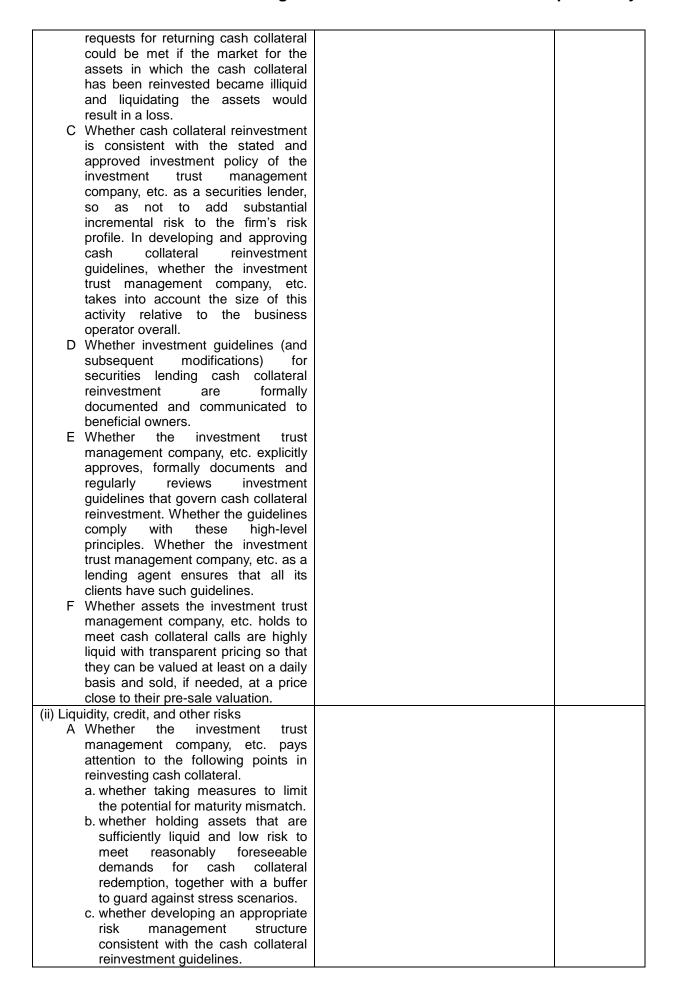

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(1) Prohibition of Advertisements Using Exaggerated Descriptions	_	_
 (i) Whether the investment trust management company, etc., includes in its advertisements descriptions indicating that the performance, contents and method of its investment are markedly superior to those of other Financial Instruments Business Operators without providing the basis therefor. (ii) When including investment performance data in its advertisement, whether the investment trust management company, etc., uses descriptions that could cause misunderstanding by investors, by putting excessive emphasis on specific parts of the performance. (When investment performance data is included in an advertisement, appropriate and easy-to-understand descriptions must be used, from the viewpoint of protecting investors. For example, it is necessary to examine whether the advertisement specifies the method of investment evaluation and the basis for the use of benchmarks and properly expresses that the investment performance data is an indicator that concerns past results but 		
does not promise future performance.) (iii)When including investment simulation in its advertisement, whether the investment trust management company, etc., uses descriptions that could cause misunderstandings by investors by, for example, setting arbitrary assumptions. (When investment simulation is included in an advertisement, appropriate and easy-to-understand descriptions must be made, from the viewpoint of protecting investors. For example, it is necessary to examine whether the advertisement specifies the basis for the use of assumptions in the simulation and properly indicates that the simulation is based on prescribed assumptions and does not promise future investment performance.)		

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(1) Points of Attention Regarding		
Investment Trust Management		
Companies, etc., Engaging in Two or More Types of Business		
When supervisors examine the		
appropriateness of measures taken by		
an investment trust management		
company, etc., which is engaging in		
two or more types of business (as specified under Article 29-2(1)(v) of	_	_
the FIEA), to prevent internal		
collusion, they shall pay attention to		
the following points, for example,		
depending on the nature of its		
business, from the viewpoint of		
preventing conflicts of interests and ensuring the appropriateness of		
ensuring the appropriateness of business operations in other ways.		
(i) Whether the investment trust		
management company, etc., has taken		
appropriate measures to prevent		
collusion between its different types of		
business, such as establishing an		
internal control system and procedures for the prevention of such collusion in a		
manner suited to the nature of its		
business.		
(ii) Regarding the "non-disclosure		
information," as specified under Article		
147(ii) of the FIB Cabinet Office		
Ordinance, whether the investment trust management company, etc., has put in		
place information management		
measures, such as the appointment of		
the relevant manager and the		
establishment of management rules, and		
ensures the effectiveness of information		
management by, for example, properly identifying and examining the status of		
the usage of the non-disclosure		
information and revising the		
management method as necessary.		
(2) Points of Attention Regarding Prevention of Conflicts of Interest in		
Investment Management Business	_	_
Whether appropriate measures have been		
taken to prevent practices that could		
promote the interests of specific rights		
holders at the expense of other rights		
holders, such as establishing an internal		
control system and procedures for the prevention of internal collusion between		
different types of business in a manner		
suited to the nature of the business.		
(3) Duty of Loyalty to Rights Holders	_	
It should be kept in mind that if an		
investment trust investment company, etc.,		
causes financial damage to a rights holder		

due to a clerical error involved in the investment of investment assets and fails to compensate for the damage, it could	
constitute a violation of the duty of loyalty.	
The same shall apply to cases where the	
clerical error occurs at an entity to which	
business operations are entrusted and	
where the investment trust management	
company, etc., which has the obligation of	
duty to the rights holder fails to compensate	
for the damage.	

Other Points of Attention (the Guidelines for Supervision VI-2-3-5) (the Guidelines for Supervision VI-2-2-5(2) and (3))

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(2) Points to consider in the reinvestment of cash collateral When a investment trust management company, etc. who is the securities lender (and/or its agent) reinvest the cash collateral received in securities lending transactions with collateral, the business operator shall pay attention to the following points only if the said cash collateral reinvested are managed with leverage, in accordance with the Recommendation 6 of the "Strengthening Oversight and Regulation of Shadow Banking: Policy Framework for Addressing Shadow Banking Risks in Securities Lending and Repos" published by the FSB (Financial Stability Board) in August 2013.		
(i) High-level principles A Whether the investment trust management company, etc., in developing its cash collateral reinvestment strategy and investment guidelines, takes into account the possibility that the cash collateral could be recalled at any time by the party that borrowed securities, considers whether the business operator holds assets that are sufficiently liquid to meet reasonably foreseeable recalls of cash collateral, and takes measures to manage the associated liquidity risk. B Whether securities lending cash collateral reinvestment is conducted with one of the primary objectives being capital preservation. In particular, whether cash collateral reinvestment guidelines take into account whether unexpectedly large		

B Whether the following requirements	
for the cash collateral reinvestment	
portfolio and/or liquidity pool	
maintained to meet cash collateral	
recalls are set and continuously	
complied.	
g. Whether a minimum portion of the	
cash collateral is set for the	
following portfolio that can be	
readily converted to cash over	
short time horizons, such as one	
day and one week, to meet	
potential recalls of cash collateral:	
- Short-term deposits (with high-	
quality financial institutions),	
- Highly liquid short-term assets	
(such as high quality	
government treasury bills and	
bonds), and	
- Short tenor transaction (such as	
overnight or open reverse repos	
backed by highly liquid assets).	
h. Whether the investment trust	
management company, etc. sets	
specific limits for the weighted	
average maturity (WAM) and/or	
weighted average life (WAL) of the	
portfolio in which the cash	
collateral is reinvested.	
i. Whether the investment trust	
management company, etc. sets	
maximum limits for the remaining	
term to maturity for any single	
investment in which the cash	
collateral is reinvested, which	
could vary by asset class based on	
the liquidity of the instruments.	
(iii) Stress test	
A Whether the investment trust	
management company, etc. stress	
tests its ability to meet foreseeable	
and unexpected calls for the return of	
cash collateral on an ongoing basis.	
B Whether these stress tests stated in	
(i) above include an assessment of	
the business operator's ability to	
liquidate part or the entire	
reinvestment portfolio under a range	
of stressed market scenarios,	
including:	
a. interest rate changes,	
b. higher cash collateral recalls from	
securities borrowers,	
c. higher redemptions by investors in	
the funds being lent, and	
d. changes in the credit quality of the	
portfolio in which the cash	
collateral is reinvested.	
(iv) Disclosure	
A Whether the investment trust	
management company, etc. as an	
management company, etc. as all	

agent securities lender frequently		
discloses to their clients (the		
`		
beneficial owners of securities) the		
composition and valuation of their		
portfolio of securities on loan and		
·		
their cash collateral reinvestment		
portfolio.		
B Whether the disclosure stated in (i)		
1,7		
above includes, at a minimum, the		
following items:		
a.the percentage of assets held in		
cash or cash equivalents over a		
one day and one week liquidation		
horizon;		
b. the WAM and WAL of the portfolio		
in which the cash collateral is		
reinvested;		
c.the maximum remaining term to		
-		
maturity of any individual		
investment;		
d. the percentage of assets that are		
held in illiquid securities (and how		
these are defined);		
e. the maximum exposure of the fund		
being lent to the following items:		
 individual security, 		
- issuer, and		
·		
- asset type;		
f. the split between secured and		
unsecured exposures;		
g. the distribution of collateral		
5		
received in reverse repo;		
h. the average yield of the portfolio in		
which the cash collateral is		
reinvested; and		
i. results from liquidity stress tests.		
(3) Points to consider in repo-type		
transactions		
When the investment trust		
management company, etc. engages		
in the lending and borrowing of		
securities, or the sale or purchase of		
securities on condition of repurchase		
or resale, with collateral (hereinafter		
referred to as "repo-type		
transactions") (including cases where		
the investment trust management		
company, etc. is an agent), whether it		
establishes internal rules in regard to	-	<u> </u>
the assessment and management of		
collaterals covering the following		
items, in accordance with the		
Recommendation 9 of the		
"Strengthening Oversight and		
Regulation of Shadow Banking: Policy		
Framework for Addressing Shadow		
Banking Risks in Securities Lending		
and Repos" published by the FSB		
(Financial Stability Board) in August		
2013.		
(i) Collateral types		

Whether the investment trust	
management company, etc., in	
conducting repo-type transactions, only	
takes collateral types that they are able	
following a counterparty failure to:	
A hold for a period without breaching	
laws or regulations;	
B value; and	
C risk manage appropriately.	
(ii) Contingency plan	
A Whether the investment trust	
management company, etc. has	
contingency plans for the failure of	
their largest market counterparties,	
including in times of market stress.	
B Whether these plans stated in (i)	
above include:	
a. how the investment trust	
management company, etc. would	
manage the collateral following	
default; and	
b. the capabilities to liquidate the	
collateral in an orderly way.	
(iii) Margin call	
A Whether collateral and lent securities	
are marked to market at least daily.	
B Whether margin calls (referred to as	
the right to claim a recovery of	
collateral deficiency resulting from	
marking-to-market at any time) are	
made at least daily.	

4. Fund management business

Control Environment for Business Execution (the Guidelines for Supervision VI-2-5-1(1) and (2))

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(1) Investment and Administration of Investment Assets Supervisors shall examine whether a fund management company is properly managing and administering investment assets by paying attention to the following points. It should be noted that the following points should be taken into consideration in a comprehensive manner in light of the nature and size of the fund management company's business, and that failure to meet some of the criteria should not automatically be deemed to mean that the investment and administration of investment assets are inappropriate.	_	_
(i) Whether the fund management company has properly specified the matters regarding internal organization that decide its investment policy (including a specific decision-making process).		

(ii) Whether the fund management company		
has prescribed a specific investment		
method for investment of investment		
assets by the investment division.		
(iii)Whether the fund management company		
has developed an appropriate control		
environment regarding the management		
of securities transactions between		
various investment assets and between		
investment assets and its own assets or		
third-party assets.		
(iv)In cases where the fund management		
company entrusts all or part of the		
authority over the investment made on		
behalf of rights holders (as specified		
under Article 42(1) of the FIEA; the same		
shall apply hereinafter) to another entity,		
under Article 42-3 of the FIEA (including		
cases where the entrusted entity entrusts		
part of the authority to yet another		
entity), whether the fund management		
company has properly established the		
criteria for selecting the entity to which		
the authority is entrusted and the method		
of communications therewith. Whether		
the investment management company		
has developed a control environment for		
continuously examining the entrusted		
entity's business execution capability		
and its compliance with contract		
provisions. Whether it has specified		
measures to be taken when a problem is		
found in the entrusted entity's business		
execution capability (e.g., providing		
guidance for business improvement and		
refusing to renew the entrustment		
contract).		
(v) Regarding the selection of the entities to		
which orders are placed and business		
operations are entrusted, whether the		
fund management company has properly		
specified the matters concerning the		
entities' transaction execution capability,		
control environment for legal compliance,		
credit risk and trading costs as items that		
should be taken into consideration.		
(vi)Whether the fund management company		
has arrangements and procedures for a		
division independent from the investment		
division to periodically examine whether		
investment assets are properly invested		
(including whether records on the		
investment status are stored), including		
whether the investment decision process		
is appropriate, in accordance with the		
investment guideline or the investment		
contract specified under Article 2(2)(v) of		
the FIEA.		
(2) Execution of Transactions		
When fund management companies	_	_
	_	_
execute transactions, they are		

required to select the transaction form	
that benefits customers most, by	
taking into consideration the	
transaction price and other execution	
costs in a comprehensive manner. In	
light of the increasing diversification	
of the transaction forms due to the	
advance of financial techniques,	
supervisors shall examine the status	
of a fund management company's	
transaction execution by paying	
attention to the following points, for	
example:	
•	
(i) At-Average-Price Transaction (transaction	
made at the average of prices of various	
orders of the same transaction and	
delivery dates aggregated by issue and	
order category (sell or buy))	
A. Separation of Divisions	
Whether the fund management	
company has separate divisions for	
making investment divisions and for	
taking orders. In cases where	
organizational separation is difficult,	
•	
whether, at the minimum, different	
persons are responsible for these two	
tasks.	
B. Examination of Transactions	
Whether the fund management	
company has a control environment	
for ensuring that a relevant	
management division, for example,	
examines the whole range of business	
processes related to at-average-price	
transactions.	
C. Disclosure to Customers and	
Consent Thereof	
Whether the fund management	
company makes at-average-price	
transactions after making prior	
disclosure to customers and	
obtaining their consent. In cases	
where the fund management	
company makes orders involving	
proportional allocation of executed	
transactions with regard to two or	
more investment asset accounts,	
whether it provides customers with	
appropriate explanations regarding	
the criteria for allocation, in the case	
of the total executed transaction	
volume falling short of the total order	
volume.	
(ii)Transactions Made via Bulk Orders	
In cases where the fund management	
company places a bulk sell or buy order	
for the same issue on behalf of two or	
more investment asset accounts, and	
allocates the executed transactions to	
each asset account based on the	
allocation criteria prescribed by the	

Financial Instruments Business Operator after aggregating the transactions by issue and by buy/sell order, whether it has developed a control environment similar to the one described in (i) above, from the viewpoint of ensuring fairness among customers. (iii)Transactions Made between Investment **Asset Accounts** Transactions made between investment asset accounts are in principle prohibited because there is risk that investors in one of the funds involved in the transactions may receive unfavorable treatment and that such transactions may be utilized in acts that go against investor protection such as transfers of profits between the funds. On the other hand, of transactions specified under Article 129(1)(i) of the FIB Cabinet Office Ordinance, if a transaction between investment assets accounts falls under a case where the prohibition of transactions between investment assets accounts does not apply, the relevant management division is required to be adequately prepared to verify that the transactions meet the requirements in (a) and (b) of Article 129(1)(i). The "case where it is deemed to be necessary and rational," as specified by Article 129(1)(i)(a)(4) of the FIB Cabinet Office Ordinance, is a case in which transactions between investment assets accounts executed by fund management companies meet the need to ensure fairness among customers and fulfill their duties of best execution and loyalty to and this applies customers. transactions in which relevant "sell" or "buy" decisions by both of the funds executing the transactions between investment assets accounts are deemed necessary and rational, and that such transactions are executed in the best possible manner for the investment decisions thus made (or the transactions executed to follow best execution practice result in the offsetting of possible losses involved in such transactions). In determining whether there necessity and rationality, factors such as the investment policy of the funds involved (including in-house investment limits introduced by the fund management businesses for the purpose of risk management, etc.), inflow or outflow of associated cancellation/formation of funds (including whether there is a need to sell or buy assets in order to maintain the portfolios

of individual funds, etc.), etc. are considered.

On the other hand, from the viewpoint of best execution practice, factors such as transaction costs, mitigation of market impact, etc. are considered in addition to transaction prices.

From the above viewpoints, such transactions as listed below are considered as ones in which fairness among funds and fair price formation are ensured and as constituting a "case where it is deemed to be necessary and rational." (It must be noted, however, that these are shown only as examples and not the only ones that qualify.)

- A. To have traders execute transactions based on investment decisions made by several fund managers (limited to transactions regarding which there is not the risk of the price formation process being distorted in light of liquidity and other factors related to the relevant issue and, in cases where the transactions are executed by the same trader, the trader has no discretion over execution).
- B. To place both market buy and sell orders before the market's opening (limited to orders which have no risk of distorting the price formation process in light of liquidity and other factors related to the relevant issue).
- C. To place both buy and sell orders in intraday trading at a reasonable interval (limited to orders which have no risk of distorting the price formation process in light of liquidity and other factors related to the relevant issue).
- D. To conduct transactions related to index funds executed through program trading based on contracts and trust contract provisions (limited to transactions which have no risk of distorting the price formation process in light of liquidity and other factors related to the relevant issue).
- E. To make VWAP transactions and discretionary transactions, regarding which the decision on the timing of order placement, price and other execution terms related to individual issues are entrusted by the fund management company to a third-party entity (limited to transactions which have no risk of distorting the price formation process in light of liquidity and other factors related to the relevant issue).
- F. To make futures transactions, regarding which it is difficult to avoid

the placement of orders for the same	
issue because of the small number of	
issues available for futures trading	
(limited to transactions which have	
no risk of distorting the price	
formation process in light of liquidity	
and other factors related to the	
relevant issue).	

Control Environment for Customer Solicitation and Explanations (the Guidelines for Supervision VI-2-5-2(1) and (2))

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(1) Prohibition of Advertisements Using		
Exaggerated Descriptions	_	
(i) Whether the fund management		
company includes in its advertisements		
descriptions indicating that the		
performance, contents and method of		
its investment are markedly superior to		
those of other Financial Instruments		
Business Operators without providing		
the basis therefor.		
(ii) When including investment		
performance data in its advertisement,		
whether the fund management		
company uses descriptions that could		
cause misunderstanding by investors,		
by putting excessive emphasis on		
specific parts of the performance.		
(When investment performance data is		
included in an advertisement,		
appropriate and easy-to-understand		
descriptions must be used, from the		
viewpoint of protecting investors. For		
example, it is necessary to examine		
whether the advertisement specifies		
the method of investment evaluation		
and the basis for the use of		
benchmarks and properly expresses		
that the investment performance data is		
an indicator that concerns past results		
but does not promise future		
performance.)		
(iii)When including investment simulation in		
its advertisement, whether the fund		
management company uses		
descriptions that could cause		
misunderstandings by investors by		
setting arbitrary assumptions, for		
example. (When investment simulation		
is included in an advertisement,		
appropriate and easy-to-understand		
descriptions must be made, from the		
viewpoint of protecting investors. For		
example, it is necessary to examine		
whether the advertisement specifies		
the basis for the use of assumptions in		
the simulation and properly indicates		

that the simulation is based on prescribed assumptions and does not promise future investment performance.)		
(2) Points of Attention Regarding Provision of Pre-Contract		
Documents Pre-contract	_	_
In cases where a fund management company concurrently conducts business unrelated to investment management and where it receives remuneration related to investment management business and fees related to other business collectively under the same contract, the fund management company must separately specify the remuneration related to investment management business and the fees related to other business with regard to the "matters concerning fees, remuneration or any other consideration payable by the customer with regard to said Contract for Financial Instruments Transaction," as specified under Article 37-3(1)(iv) of the FIEA		

Duty of Loyalty and Measures to Prevent Internal Collusion (the Guidelines for Supervision VI-2-5-3(1) to (3))

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(1) Points of Attention Regarding Fund Management Companies Engaging in Two or More Types of Business When supervisors examine the appropriateness of measures taken by a fund management company, which is engaging in two or more types of business (as specified under Article 29-2(1)(v) of the FIEA), to prevent internal collusion, they shall pay attention to the following points, for example, depending on the nature of its business, from the viewpoint of preventing conflicts of interests and ensuring the appropriateness of business operations in other ways.		_
 (i) Whether the fund management company has taken appropriate measures to prevent collusion between its different types of business, such as establishing an internal control system and procedures for the prevention of such collusion in a manner suited to the nature of its business. (ii)Regarding the "non-disclosure information," as specified under Article 147(ii) of the FIB Cabinet Office Ordinance, whether the fund management company has put in place 		

information management measures, such as the appointment of the relevant manager and the establishment of management rules, and ensures the effectiveness of information management by, for example, properly identifying and examining the status of the usage of the non-disclosure		
information and revising the		
management method as necessary.		
(2) Points of Attention Regarding		
Prevention of Conflicts of Interests in	_	
Investment Management Business Whether appropriate measures have		
been taken to prevent practices that could		
promote the interests of specific rights		
holders at the expense of other rights		
holders, such as establishing an internal		
control system and procedures for the		
prevention of collusion between different		
types of business in a manner suited to the nature of the business.		
(3) Duty of Loyalty to Rights Holders		
It should be kept in mind that if a fund	_	
management company causes financial		
damage to a rights holder due to a clerical		
error involved in the investment of		
investment assets and fails to compensate		
for the damage, it could constitute a		
violation of the duty of loyalty. The same		
shall apply to cases where the clerical error		
occurs at an entity to which business		
operations are entrusted and where the		
fund management company that has the		
obligation of duty to the investor fails to		
compensate for the damage.		

Other Points of Attention (the Guidelines for Supervision VI-2-5-4) (the Guidelines for Supervision VI-2-2-5(2) and (3))

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(2) Points to consider in the reinvestment of cash collateral When a fund management company. who is the securities lender (and/or its agent) reinvest the cash collateral received in securities lending transactions with collateral, the business operator shall pay attention to the following points only if the said cash collateral reinvested are managed with leverage, in accordance with the Recommendation 6 of the "Strengthening Oversight and Regulation of Shadow Banking: Policy Framework for Addressing Shadow Banking Risks in Securities Lending and Repos" published by the FSB		

(Financial Stability Board) in August	
2013.	
(i) High-level principles	
A Whether the fund management	
company., in developing its cash	
collateral reinvestment strategy and	
investment guidelines, takes into	
account the possibility that the cash	
collateral could be recalled at any time by the party that borrowed	
securities, considers whether the	
business operator holds assets that	
are sufficiently liquid to meet	
reasonably foreseeable recalls of	
cash collateral, and takes measures	
to manage the associated liquidity	
risk.	
B Whether securities lending cash	
collateral reinvestment is conducted	
with one of the primary objectives	
being capital preservation. In	
particular, whether cash collateral	
reinvestment guidelines take into	
account whether unexpectedly large	
requests for returning cash collateral	
could be met if the market for the assets in which the cash collateral	
has been reinvested became illiquid	
and liquidating the assets would	
result in a loss.	
C Whether cash collateral reinvestment	
is consistent with the stated and	
approved investment policy of the	
fund management company, as a	
securities lender, so as not to add	
substantial incremental risk to the	
firm's risk profile. In developing and	
approving cash collateral	
reinvestment guidelines, whether the	
fund management company, takes	
into account the size of this activity	
relative to the business operator overall.	
D Whether investment guidelines (and	
subsequent modifications) for	
securities lending cash collateral	
reinvestment are formally	
documented and communicated to	
beneficial owners.	
E Whether the fund management	
company. explicitly approves,	
formally documents and regularly	
reviews investment guidelines that	
govern cash collateral reinvestment.	
Whether the guidelines comply with	
these high-level principles. Whether	
the fund management company, as a	
lending agent ensures that all its	
clients have such guidelines. F Whether assets the fund	
management company. holds to meet	
management company. Holds to meet	

cash collateral calls are highly liquid	
with transparent pricing so that they	
can be valued at least on a daily	
basis and sold, if needed, at a price	
close to their pre-sale valuation.	
(ii) Liquidity, credit, and other risks	
A Whether the fund management	
company. pays attention to the	
following points in reinvesting cash	
collateral.	
a. whether taking measures to limit	
the potential for maturity mismatch.	
b. whether holding assets that are	
sufficiently liquid and low risk to	
meet reasonably foreseeable	
demands for cash collateral	
redemption, together with a buffer	
to guard against stress scenarios.	
c. whether developing an appropriate	
risk management structure	
consistent with the cash collateral	
reinvestment guidelines.	
B Whether the following requirements	
for the cash collateral reinvestment	
portfolio and/or liquidity pool	
maintained to meet cash collateral	
recalls are set and continuously	
complied.	
j. Whether a minimum portion of the	
cash collateral is set for the	
following portfolio that can be	
readily converted to cash over	
short time horizons, such as one	
day and one week, to meet	
potential recalls of cash collateral:	
- Short-term deposits (with high-	
quality financial institutions),	
- Highly liquid short-term assets	
(such as high quality	
government treasury bills and	
bonds), and	
- Short tenor transaction (such as	
overnight or open reverse repos	
backed by highly liquid assets).	
k. Whether the fund management	
company, sets specific limits for the	
weighted average maturity (WAM)	
and/or weighted average life (WAL)	
of the portfolio in which the cash	
collateral is reinvested.	
I. Whether the fund management	
company, sets maximum limits for	
the remaining term to maturity for	
any single investment in which the	
cash collateral is reinvested, which	
could vary by asset class based on	
the liquidity of the instruments.	
(iii) Stress test	
A Whether the fund management	
company. stress tests its ability to	
meet foreseeable and unexpected	
modi forosocable and unexpedied	

calls for the return of cash collateral on an ongoing basis. B Whether these stress tests stated in (1) above include an assessment of the business operator's ability to liquidate part or the entire reinvestment portfolio under a range of stressed market scenarios, including: a. interest rate changes, b. higher cash collateral recalls from securities borrowers, c. higher redemptions by investors in the funds being lent, and d. changes in the credit quality of the portfolio in which the cash collateral is reinvested. (iv) Disclosure A Whether the fund management company, as an agent securities lender frequently discloses to their clients (the beneficial owners of securities) the composition and valuation of their portfolio. B Whether the disclosure stated in (i) above includes, at a minimum, the following items: a. the percentage of assets held in cash or cash equivalents over a one day and one week liquidation horizon; b. the WAM and WAL of the portfolio in which the cash collateral is reinvested; c. the maximum remaining term to maturity of any individual investment; d. the percentage of assets that are held in illiquid securities (and how these are defined); e. the maximum exposure of the fund being lent to the following items: - individual security, - issuer, and - asset type; f. the split between secured and unsecured exposures; g, the distribution of collateral

received in reverse repo;
h. the average yield of the portfolio in
which the cash collateral is
reinvested; and
i. results from liquidity stress tests.
(3) Points to consider in repo-type
transactions
When the fund management
company engages in the lending and
borrowing of securities, or the sale or
purchase of securities on condition of

repurchase or resale, with collateral (hereinafter referred to as "repo-type transactions") (including cases where the fund management company. is an agent), whether it establishes internal rules in regard to the assessment and management of collaterals covering the following items, in accordance with the Recommendation 9 of the "Strengthening Oversight and Regulation of Shadow Banking: Policy Framework for Addressing Shadow Banking Risks in Securities Lending and Repos" published by the FSB (Financial Stability Board) in August 2013.	
(i) Collateral types	
Whether the fund management	
company in conducting repo-type transactions, only takes collateral types	
that they are able following a	
counterparty failure to:	
A hold for a period without breaching	
laws or regulations;	
B value; and	
C risk manage appropriately. (ii) Contingency plan	
A Whether the fund management	
company has contingency plans for	
the failure of their largest market	
counterparties, including in times of	
market stress. B Whether these plans stated in (i)	
above include:	
a. how the fund management	
company would manage the	
collateral following default; and	
b. the capabilities to liquidate the	
collateral in an orderly way. (iii) Margin call	
A Whether collateral and lent securities	
are marked to market at least daily.	
B Whether margin calls (referred to as	
the right to claim a recovery of	
collateral deficiency resulting from marking-to-market at any time) are	
made at least daily.	
made at least daily.	

In addition to the above, if you fall under the real estate-related fund management company, also answer the following items.

Control Environment for Legal Compliance (the Guidelines for Supervision VI-2-6-1)

Guidelines for Supervision	Outline of the company response	Applicable internal rule
Real estate-related fund management companies' control environments for legal compliance shall basically be examined based on the supervisory viewpoints and methods specified in III-2-1. However, they		

shall also be examined in relation to a	
broad range of matters, including measures	
to prevent conflicts of interest specific to	
the real estate-related fund business.	

Internal Control Environment (the Guidelines for Supervision VI-2-6-2)

Guidelines for Supervision	Outline of the company response	Applicable internal rule
As real estate-related fund management		
companies are bound to the duties of due		
care and loyalty, they are required to		
establish a sufficient control environment		
for legal compliance and risk management.		
Their management teams need to		
formulate various rules that ensure		
thorough legal compliance and risk		
management rules that ensure appropriate		
risk management based on the analysis		
and evaluation of risks involved in real		
estate investment, and check the status of		
compliance therewith.		
It should be kept in mind that in doing the		
above, the management teams need to		
establish an internal control environment,		
including a control environment for due		
diligence that pays due consideration to the		
unique characteristics of real estate.		

Evaluation Items Concerning Operations of Real Estate-related Fund Management Companies (the Guidelines for Supervision VI2-6-3(1) to (5))

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(1) Evaluation Items Concerning Due Diligence Control Environment for Purchase and Sales of Real Estate Real estate due diligence is an important task for the understanding of the legitimate investment value of real estate, and thus its appropriateness shall be examined with due consideration of the following points. Meanwhile, the management team must always understand the progress of implementation of measures to ensure the appropriateness of due diligence and the effectiveness of examination functions, while remaining aware of the issues.	_	
(i) Examinations shall be performed to see whether estimates of various costs of repair/renewal are appropriately investigated and reflected in the appraised value of real estate, considering the significance of an impact on cash flows in the future.		

(ii) The DCF method is an approach for		
valuation based on cash flows, and is a		
major and effective method for the		
appraisal of real estate. However, there		
are many preconditions, which may blur		
details. Thus, the point is whether the		
following items are verified, and the		
result of verification is recorded when		
the DCF method is adopted.		
A. Validity of adopted figures (based		
, , , , , , , , , , , , , , , , , , , ,		
on the projected estimates, in		
particular) and basis for judgment		
B. Validity of the overall scenario and		
basis for judgment		
C. Comparison and balance between		
the result of adopting the DCF		
method and the result of adopting		
other methods/means.		
(iii)The following points shall be considered		
when entrusting the formulation of		
•		
engineering reports (ER) and appraisal		
reports and receiving them:		
A. Whether it is ensured that ER		
writers and real estate appraisers		
make impartial decisions based on		
·		
objective standards.		
B. Whether necessary information etc.,		
is provided to ER writers and real		
estate appraisers, when requesting		
ERs and real estate appraisal. Also,		
whether such provision of		
information, etc. is properly		
managed.		
C. Whether the following points are		
confirmed in addition to necessary		
•		
examinations on how the		
information, etc., mentioned in B.		
above has been reflected in the		
requested ER:		
a. Whether necessary investigations		
· · ·		
are conducted and the		
investigation results are justified		
by objective grounds when		
investigating soil contamination		
and harmful substances.		
b. Whether it is confirmed what kind		
of repairs are used as the basis		
for calculations of cost estimates		
of repairs and renewals of		
individual parts of a building.		
c. Whether necessary verifications		
of compliance have been		
conducted regarding the target		
property, not only compliance		
with laws but also with		
ordinances, such as district		
plans, etc.		
D. When receiving the appraisal report		
from the appraiser who was		
requested to perform the		
evaluation, whether the necessary		
	1	

examination has been conducted to		
see how the information, etc., listed		
B. above has been reflected in the		
report and whether the following		
points have been verified:		
a. Whether the concept of ER has		
been considered and reflected.		
Whether the reasons and		
grounds for any items not being		
reflected have been confirmed.		
b. In the case of adopting the DCF		
. •		
method, whether estimates of		
future income and utilization rate,		
etc., are verified as relevant and		
based on objective data. Also,		
whether the level of relevance		
has been verified in the same		
way for the estimation of discount		
rates and terminal rates, which		
,		
serve as preconditions.		
c. Whether necessary examinations		
have been performed of items		
that may possibly influence the		
liquidity of the real estate itself		
and the cash flows that would be		
generated by the real estate.		
E. In the cases where listed details in		
the ER and appraisal report are not		
used when calculating the		
_		
purchase/sales price based on the		
result of due diligence, whether the		
relevance of adopted values, etc., is		
verified and the basis for such		
values is recorded and stored.		
(2) Control Environment for Preventing		
Conflict of Interest Transactions		
The management team needs to be		
aware of the potential for risks of		
conflict of interest transactions to		
occur, and identify not only		
interested persons specified in laws,		
but also possible business partners	_	_
with which conflicts of interest may		
arise, and then to establish an		
adequate management system		
concerning the transactions with		
these persons. Examination shall be		
made, focusing on the following		
points.		
(i) In cases where the management team		
adopts a policy to the effect that a fair		
transaction price for acquiring property		
can be calculated on the basis of the		
appraised value of the real estate, with		
a certain range of adjustment, whether		
the real estate-related fund		
management company has developed		
a control environment for periodically		
examining the appropriateness of such		
range of adjustment in view of the		
market conditions; whether the real		
i market conditions, whether the feat		

estate-related fund management company has developed a control environment for appropriately announcing such policy (if the policy is revised, the reasons for the revision
company has developed a control environment for appropriately announcing such policy (if the policy is
environment for appropriately announcing such policy (if the policy is
announcing such policy (if the policy is
raying the reasons for the rayinian
revised, the reasons for the revision r
shall be included) (in the case of a
, ,
private placement fund, such
announcement shall be made by
making notifications to subscribers).
(ii)Whether the real estate-related fund
management company has developed
a centralized management system for
property information (including the state
of negotiations concerning purchase
and sales, etc.), and authorized
compliance personnel to manage
negotiations concerning sales and
purchases from the perspective of
preventing conflict of interest
transactions.
(iii)Whether the real estate-related fund
management company is aware of a
high risk of conflict of interest occurring
in cases where it uses the warehousing
function when it is unable to acquire
real estate held by a third party at the
time said party wishes to sell the same,
and with this in mind, carries out
negotiations, clarifies the sharing of
roles, and conducts due diligence
procedures appropriately.

requirements must be met.		
When an investment corporation wants to		
acquire a real estate asset located		
overseas but the corporation itself is unable		
to do so because of inevitable reasons		
including local laws and local practices,		
such a corporation can acquire a majority of		
shares with voting rights in the company		
that holds the said real estate asset		
(hereinafter referred to as "overseas real		
estate holder"). In such a case, all of the		
following requirements must be met.		
(i) The overseas real estate holder's sole		
()		
purpose of business is acquisition,		
assignment and other transactions of		
real estate assets in the country of its		
location.		
(ii) The investment corporation receives		
annual payments from the funds		
available to pay out by the overseas		
real estate holder as dividends in an		
amount proportionate to the percentage		
of the number of shares the investment		
corporation holds or the amount it		
invests in the overseas real estate		
holder (or an amount paid out in		
accordance with laws or practices in		
the overseas real estate holder's		
country of location).		
(iii) The overseas real estate holder has its		
financial statements audited or verified		
by a tirm and add in conducting audite		
by a firm engaged in conducting audits		
or verification at the request of		
or verification at the request of customers.		
or verification at the request of customers. (5) Others	_	_

However, in cases where an investment corporation is unsuitable to conclude a contract for the development of housing sites or construction of buildings, including the following cases, such practice does not fall within the scope of "acquisition of real estate." A. When conducting large-scale repair and renovation work, etc., tenants need to be relocated for a certain period of time, and the fluctuations of cash flows will heavily affect the		

constructs new buildings, various	
risks will be involved in the	
development of real estate	
(development risk, authorization	
risk, construction completion risk,	
tenant risk, price fluctuation risk,	
The state of the s	
interest fluctuation risk during	
development, and large natural	
disaster risk, etc.), and such risks	
may greatly affect the entire	
portfolio because the investment	
does not generate immediate cash	
flows.	
(ii)Forward Commitment by Investment	
Corporations	
In cases where an investment	
·	
commitment, etc. (referring to a	
postdated sales contract under which	
payment and delivery shall be made at	
least one month after the conclusion of	
the contract, or any other contract	
similar thereto; hereinafter the same	
shall apply in (ii)), attention shall be paid	
to the following points. Similar treatment	
shall be applied in cases where an	
investment corporation manifests the	
intention to make a postdated purchase,	
if such manifestation of intention is	
effectively binding on the transaction.	
A. Whether the investment corporation	
clearly shows the possible impact	
on its financial status in the event of	
its failure to fulfill the forward	
commitment, etc., by appropriately	
announcing the terms of	
cancellation.	
B. Whether the investment corporation	
has, while taking into consideration	
the market environment, financing	
environment and the individual	
situations of the corporation, drawn	
up rules regarding the acquisition	
price of the property under a	
forward commitment, etc. and the	
maximum period from the	
conclusion of the contract until the	
delivery of the property, as well as	
the method for procuring funds for	
payment, and complies with such	
rules; in particular, in the case of a	
listed investment corporation,	
whether the corporation has	
developed a control environment for	
carefully considering a forward	
commitment, etc., under which it	
might have to pay an excessive	
penalty compared with the dividend	
resources, including the delisting	
requirements.	
C. While the property under a forward	

	1
commitment, etc. is not included in	
the balance sheet until payment is	
made for it, the price volatility risk for	
the property until that time is	
attributed to the investment	
corporation. In light of this, whether	
the investment corporation conducts	
continuous appraisal of the	
properties that it holds, and	
publicizes the results of the	
appraisal of such properties (in the	
case of properties which are yet to	
be constructed and therefore cannot	
be appraised, the results of the price	
·	
research).	
(iii)Issuance of Subordinated Investment	
Corporation Bonds by Investment	
Corporations	
In cases where the investment	
corporation issues subordinated	
•	
investment corporation bonds,	
supervisors shall check whether the	
corporation has carefully examined the	
necessity of fund raising through the	
issuance and the appropriateness of the	
terms of issuance, while taking into	
consideration that investors' interest	
would be harmed depending on the	
terms of issuance, and has publicized	
information on these matters	
appropriately.	
(iv)Control Environment for Managing the	
Outsourcing of Business Operations	
·	
Real estate-related fund management	
companies, while exercising investment	
discretion, outsource part of their	
businesses to various corporations (ER	
corporations, appraisal corporations,	
trust banks, property management	
corporations, and building management	
corporations, etc.). Thus, appropriate	
supervision over the said outsource is	
essential if they are to exercise loyalty	
and fulfill their duties. In order to	
effectuate supervisions, it is necessary	
to improve various reporting lines from	
outsourcees (both direct and indirect via	
trust banks, etc.) upon formulating	
various regulations/standards, including	
selection criteria for outsourcees,	
thereby implementing effective	
monitoring periodically. Meanwhile, it	
chould be noted that the appropriate	
should be noted that the appropriate	
clarification of role sharing between	
outsourcers and outsourcees is a	
prerequisite for a control environment for	
managing the outsourcing of business	
operations.	
(v)Investment, etc., in Development SPC	
Whether analysis and risk	
management have been appropriately	

implemented with respect to various	
risks (development risk, authorization	
risk, construction completion risk, tenant	
risk, price fluctuation risk, interest	
fluctuation risk during development, and	
large natural disaster risk, etc.). Whether	
monitoring of project progress has been	
property conducted. Meanwhile,	
attention should be taken to ensure that	
investment in the development SPC by	
funds other than those specializing in	
development-style projects does not	
impose excessive influence on the entire	
portfolio, considering that the	
development does not generate	
immediate cash flows.	
(vi)Control Environment for Managing	
Information	
As for the information management of	
real estate-related fund management	
companies, which manage listed real	
estate investment juridical persons, it is	
necessary to manage information	
appropriately, by taking measures to	
ensure confidentiality of information prior	
to decision making, such as investment	
decisions based on asset management	
outsourcing contracts, etc. (decision	
making, etc., concerning acquisition and	
sales), as well as confidentiality of	
information prior to transaction and prior	
to disclosure.	i

In addition to the above, if you fall under the Investment Management Business for Qualified Investors, also answer the following items.

Points of Attention Regarding the Control Environment for Business Execution (the Guidelines for Supervision VI-2-7-1(1) and (2), VI-3-1-2(2))

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(1) Points of Attention Regarding the Control Environment for Execution of Transactions		_
In the case of an investment management business operator for qualified investors which does not have separate divisions (personnel) for making investment decisions and for taking orders, as an alternative, whether measures have been implemented for preventing prohibited acts pertaining to investment management business, in view of the investment policy, the amount of assets managed and other circumstances of the investment management business for qualified investors.		
(2) Points to Consider in Cases Where Compliance Work is Outsourced	_	_
In cases where an investment		

management business operator for qualified investors has outsourced its compliance work, supervisors need to pay attention to the following points, for example.

It should be kept in mind that the following points are general supervisory viewpoints, and that supervisors may need to examine other points too, in view of the business operations of the investment management business for qualified investors.

- (i) Whether the business operator has clearly specified a policy and procedures for selecting the contractors.
- (ii) In cases where compliance work is entrusted to a group corporation in Japan or overseas, whether the business operator can evaluate that a system has been developed for compliance of an investment management business operator for qualified investors, considering the degree to which the said corporation possesses compliance functions and its execution of the outsourced business.
- (iii) In cases where compliance work is entrusted to an attorney, a legal professional corporation or a person equivalent thereto (hereinafter referred to as "attorney, etc." in this item (iii) and in VI-3-1-2), whether the business operator has considered the following points.
 - A. Whether the attorney, etc. entrusted with the work is a person recognized as being capable of properly carrying out the necessary guidance, etc. for complying with laws and regulations regarding financial instruments business.
 - B. Whether the following items have been stipulated in the outsourcing contract concluded with the said attorney, etc.:
 - a. Identification and examination of actual business conditions from a perspective of legal compliance
 - b. Preparation and management of a compliance manual, and periodic implementation of compliance training
 - c. Periodic preparation of a report on compliance, as well as the storing and provision of reports to the trustor
 - d. System of communication between the trustor and contractor (including responses in the event of a dispute)

e. Other matters in addition to those		
listed in a to d above, which are		
needed for compliance work		
pertaining to the investment		
management business for		
qualified investors		
(2) Items Regarding Examination of		
	_	_
Staffing		
VI-3-1-1(1) shall, in principle, be applied		
mutatis mutandis when examining the		
organization of an investment management		
business for qualified investors. In addition		
the following points shall be taken into		
account.		
(i) With regard to the position		
responsible for making asset		
investment on behalf of rights holders,		
whether at least one or two persons		
who fall under either of the following		
items have been secured as persons		
with sufficient knowledge and		
experience regarding investment		
assets.		
A. A person who has been engaged in		
the business of providing advice or		
managing the relevant assets for no		
less than one year.		
B. A person equivalent to A.		
(ii) With regard to establishment of an		
independent compliance division (staff		
in charge of compliance), whether at		
least one or two persons who fall under		
either of the following items have been		
secured as persons in charge of		
compliance (excluding cases where		
compliance work is outsourced).		
A. A person who has been engaged in		
business related to guidance for		
ensuring compliance with laws and		
regulations with regard to the		
financial instruments business for		
no less than one year.		
B. A person equivalent to A.		
(iii) With regard to the relevant business,		
, , , , , , , , , , , , , , , , , , ,		
whether at least one or two personnel		
needed for the processes listed in		
items a through m in VI-3-1-1(1)(i)F		
(excluding those not required for the		
relevant business to be conducted in		
an appropriate manner, considering the		
investment policy, the amount of assets		
managed and other circumstances of		
the investment management business		
for qualified investors) have been		
secured.		
(Note) In cases where arrangements		
and procedures for enabling		
proper compliance with laws and		
regulations are deemed to have		
been established, the business		
operator may make the		

personnel secured under item	
(ii) and the personnel secured	
under item (iii) the same.	

Measures concerning the Management of the Total Amount of All Investment Assets (the Guidelines for Supervision VI-3-1-2(3)(i))

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(3) Examination Items Pertaining to the Relevance of Investment Management Business for Qualified Investors When examining an investment management business for qualified investors, in addition to the points of attention listed in (2), supervisors shall make the following checks with regard to the management of the total amount of all investment assets and to the management of the rights holders (including the investors of a registered investment corporation that is counterparty to a contract described in Article 2(8)(xii)(a) of the FIEA and the persons specified under each item of Article 15-10-4 of the FIEA Enforcement Order; hereinafter the same shall apply in this section VI-3-1-2) for all investment assets.		
(i) Supervisors shall confirm whether an investment management business operator for qualified investors has taken measures to prevent the total amount of all investment assets exceeding the amount prescribed in Article 15-10-5 of the FIEA Enforcement Order.		

Measures concerning the Management of Rights Holders (VI-3-1-2(3)(ii))

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(ii) Investment management business		
operators for qualified investors are		
required to conduct business in a way		
such that their business operations do		
not fall under the category of "situations		
in which a Financial Instruments		
Business Operator, which conducts		
investment management business for		
qualified investors, is deemed to have		
not taken necessary and appropriate		
measures for preventing persons other		
than qualified investors from becoming		
rights holders, by such means as		
checking the attributes of rights holders		
and persons seeking to become rights		
holders and identifying the patterns of		

sale, purchase and other transactions of securities by rights holders" as prescribed in Article 123(xiii-2) of the FIB Cabinet Office Ordinance pursuant to Article 40(ii) of the FIEA.

To this end, supervisors shall confirm whether the following measures have been implemented for any investment management business for qualified investors:

- A. That internal rules for the following matters be established.
 - a. In cases where the investment management business operator for qualified investors sells the securities of its own accord: that it verifies in advance the attributes of the customers being solicited, and that it explains to customers that the securities have a restriction on resale.
 - b. In cases where a third party sells the securities: that the business operator verifies in advance the attributes of the customers being solicited, and that it verifies that customers are being told that the securities have a restriction on resale.
 - c. That the business operator continuously verifies the attributes of the rights holders and the implementation of the resale restriction (including follow-up in cases where violations of this have been identified).
- B. That there is ongoing confirmation that the attributes of solicited customers are being verified in advance and that explanations are being given about how the securities have a restriction on resale, in accordance with the abovementioned internal rules.
- C. That there is ongoing confirmation of the distribution of actual rights holders, in accordance with the abovementioned internal rules.
- D. That any violations are being appropriately followed up, in accordance with the abovementioned internal rules.
- E. That internal audits and so forth are used to examine whether the measures listed in A to D above are being implemented appropriately.

Guidelines for Supervision	Outline of the company response	Applicable internal rule
(iii)In cases where a person intending to		
conduct investment management		
business for qualified investors is a		
Financial Instruments Business		
Operator or a person who has made		
notification under the FIEA and is		
engaged in either business specially		
permitted for qualified institutional		
investors, etc. or specially permitted		
investment management business,		
supervisors shall also confirm the		
following matters.		
A. That the total amount of all		
investment assets does not exceed		
the amount prescribed in Article 15-		
10-5 of the FIB Cabinet Office		
Ordinance.		
B. That only qualified investors are		
among the rights holders for all		
investment assets.
